

Masterpiece Range Donatello Plus

With the Alivio Masterpiece Range of premium Lift Recliners, we've got comfort down to a fine art.

Lift/tilt position

Massage

Heated seat

Alivio Lift Recliners sculpt and mould to the contours of your body, providing a range of soft yet supportive positions.

Take control of your comfort level with zero gravity feature, direct pressure massage, tri-level heating, and multiple independent support features - including a lift and tilt function for a more secure entry/exit into the recliner.

The Alivio Lift Recliner Range blends modern aesthetics with a range of ultra-durable fabrics - designed to suit any home.

Zero gravity function

Features

The Donatello Plus is a full-featured lift-and-tilt recliner with a great range of features to provide the ultimate comfort, support, and safety. Features include:

Zero Gravity Function - zero gravity tilt-in-space function provides a feeling of weightlessness. This may assist in improved postural support, pressure redistribution, neck/trunk control - and may improve physiological processes such as breathing, swallowing and digestion.

Massage - choose from three pressure levels (B) with the massage function. The benefits of massage are widely known, such as reducing stress and pain and improving sleep, immunity, circulation, flexibility, and overall well-being.

Heated Seat - heated seats are known to reduce stress, relieve pain, improve circulation, and increase comfort. Choose from 3 individual seat heat settings (B).

Lift and Tilt Function - ensure that entering and exiting the chair can be completed safely- and offload additional weight-bearing pressure.

Individual Posture Supports - with five powerful individual motors for independent adjustment of the head, back, lumbar, foot, and tilt (zero gravity) function.

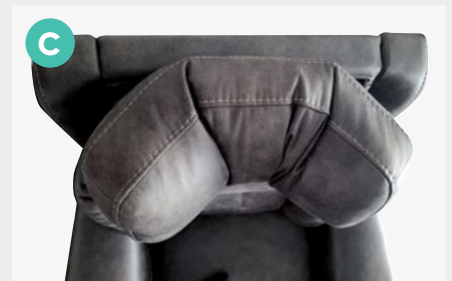

Soft-Touch Controller - many recliner functions are easily operated and managed via the soft-touch controller. Massage and heated seat features are managed via the hidden control panel located in the armrest. The controller also includes a USB port.

Wireless Phone Charger - keep your phone charged and within reach for easy access (B).

Drinks Cup holder - the hidden drinks cup holder makes hydration simple (A).

Premium Fabric - the ultra-durable seating material is designed for individual comfort, product longevity, and easy-to-clean characteristics.

Airline Head Support - Increased head and neck support with airline style head support feature (C)

General conditions that Alivio Lift Recliners may assist with:

Kyphosis

Lordosis

Arthritis

Functionality

Customer Feedback:

I came over to your shop yesterday to try out the latest chair to hit Australia and wow what a chair! There is nothing in your shop the comes close and I've tried them all. Having a fused neck, arthritis and just had two lower back surgeries I am needing support while sitting. I could never get a chair to support my lower back and neck until now because of the electric adjustable lumbar support and electric adjustable head rest. Gone are the days of trying to use pillows to get the support which could never be achieved. Even the way the chair lifts you has improved as you don't feel like you are going to land on your face.

Therapist Feedback:

I feel this would have a good application for kyphosed clients and offer adjustability not in the typical lift chairs ranges on offer. The contoured seat base is also a good feature, to assist with lower limb and pelvic positioning, acting as a lateral thigh guide to a degree. Although often client with a higher or more complex seating needs may not be the best candidate for the standard lift chairs ranges, these will be welcome additions to provide low to moderate seating support and correction which I think will be beneficial.
