

Introducing the Casero bed series

Meet the bed designed for your needs and your home

Features of the future

The Casero bed series showcases sophisticated, stylish and intelligent solutions to suit both client's needs and their homes.

Developed especially for homecare and aged care environments, the Casero series offers 4 different bed styles covering aged care and community clients, alongside additional and highly functional features to reduce falls risks as well as options for bariatric users and couples.

The Casero series is modular and configurable to your client's requirements and includes classic and contemporary designs, upholstery choices and high quality features.

The European designed 4-part telescopic side rail option offers versatility, support, safety, protection – and overall peace of mind. With an extensive range of options and accessories, the Casero series truly reimagines and merges perfectly the functional needs of our clients and the style that is important to them.

*Delivering home style luxury beds
across all care settings*
