Your home. Your health. We care.

REGIA BED

Luxury Homecare Beds for more comfort.

Statewide Home Health Care is proud to bring to Australia the Regia, the latest in homecare bedding solutions from Germany's leader in state-of-the-art bed technology Stiegmeyer.

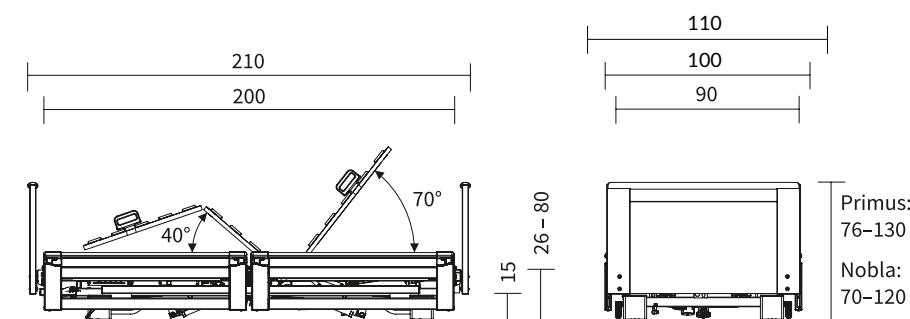

The many benefits of Regia Home care beds are the result of highly innovative engineering that has transformed an ordinary steel tube hospital bed into a state-of-the-art healthcare bed.

The Regia Homecare Bed combines all the essential functions of a hospital bed with enhanced styling, to give the bedroom a home-like ambience for improved comfort and wellbeing.

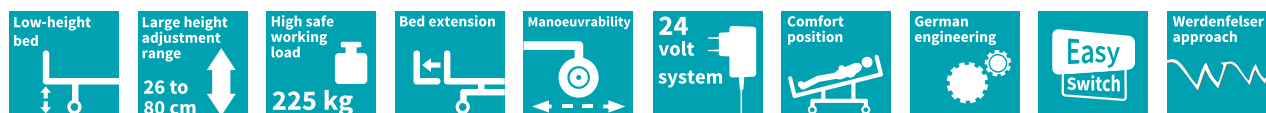

The Regia offers the option of firmly upholstered headboards, footboards, and side panels. Along with the choice of high-quality fabrics is a large selection of elegant wood decors that transform the bed into a comfortable designer piece to suit every taste.

A full range of positioning functions and protective devices for increased mobility, rock solid stability, and guaranteed electrical safety.

Additionally, configure the Regia with the Easy Switch Rail System that allows for telescopic split safety sides to be snapped on and off in seconds. This enables the bed to meet your changing needs, and makes it easy to adapt to new situations, offering an ideal balance between protection and freedom.

REGIA PARTNER BED

With the Regia Partner, you have a flexible solution in every situation. The double bed meets every care requirement just as expertly as the Regia single beds.

The design of the Regia Partner places great emphasis on providing individual comfort for both users and at the same time ensuring optimal protection.

The backrest and leg rests of the two mattress bases can be adjusted individually to allow one person to read, for example, while the other is asleep. Each half of the bed has its own handset for this purpose.

The mattress bases of the bed always move synchronously during height adjustments and tilting. This prevents trapping hazards for users that could otherwise occur due to gaps opening between the mattress bases.

EASY SWITCH

The patented system for adaptable care beds with standard-compliant safety.

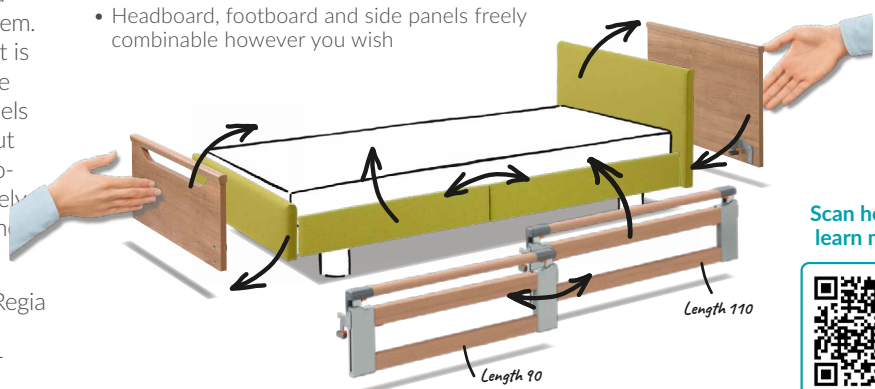

Choose the Regia with the telescopic split safety side or without a safety side and benefit from our flexible Easy Switch system. The Easy Switch principle is as easy as it is impressive: the safety side elements, the headboard, footboard, and the side panels can all be attached and removed without tools. This is possible thanks to easy-to-use fasteners that snap into place securely and cannot be accidentally opened by the resident.

Thanks to the Easy Switch system, the Regia can easily be fitted any time with safety sides or a new look and adapted to your requirements.

It becomes a bed that develops with you and supports you in every phase of your life. The removable safety sides are quick to convert to whatever care situation may arise. They also make it considerably easier to assemble the bed.

Replacing headboards in seconds

- Homelike design variants with optional handle bars
- Attractive wood decors, fabrics and faux leather to choose from
- Headboard, footboard and side panels freely combinable however you wish

Scan here to learn more!

Replacing or removing footboards

- Removable footboard allows better access to the resident, e.g. for foot care
- Choice between a high footboard for a feeling of security or a low footboard for an unobstructed view

Attaching or removing split safety sides

- Two 90 and 110 cm elements can be freely combined or used separately
- Use of only a 110 cm safety side element at head end provides standard-compliant protection
- Use of only a 90 cm safety side element at head end provides reassurance and orientation and leaves ample space to get in and out of bed

REGIA SAFETY SIDES

Safety sides can be freely combined:

Attach or remove split safety sides as required

- Two 90 and 110 cm elements can be freely combined or used separately
- Use of only a 90 cm safety side element at head end provides reassurance and orientation and leaves ample space to get in and out of bed

Raising the safety side at the head end to the second stage offers an ideal balance between freedom and protection, while still meeting the relevant standards.

Raised to the first level at the head end, the telescopic split safety side (TSG) is an orientation aid and enables users to get in and out of bed unassisted.

Raising the safety side diagonally gives a reassuring feeling of safety.

Users at risk of falling are reliably protected by fully raising the safety side.

Regia

PRODUCT FEATURES

- Electric Hi Lo
- Height adjustment 260 to 800 mm
- Electric backrest with contour adjustment
- Electric knee-bend
- Four-section metal slat mattress base with sliding backrest
- Electric raising of the lower leg rest (210 mm)
- Electric foot tilt, comfort position

- Selectively lockout handset
- Synchronized electric hand control units available for partner bed

Options

- Split safety sides for individual protection in any situation
- Battery backup
- Under bed light
- 20cm bed extension

Mattress Base

Single	90 × 200 cm
Partner Bed	90 × 200 cm
Euro King Single	100 × 200 cm
King Single	110 × 200 cm

Design

- Home-like wood decors and Head/Footboard designs.
- Fabrics and faux leathers

Fully maintained and supported by our Australia wide trained Technical team.

Positioning Options

Adjustment features for many medical requirements

- Four-section mattress base with motorised adjustment
- Tiltable bed frame for Trendelenburg and reverse-Trendelenburg positions, and for a comfortable sitting position
- Breathing and circulation support

The cardiac chair position reduces the strain on the heart and strengthens the circulation.

The Trendelenburg position can reduce the efforts of shock.

The tilt capability of the bed frame allows the feet to be lowered to the reverse-Trendelenburg position, e.g. to facilitate swallowing and to prevent aspiration.

Adjusting the lower leg rest to about 22° relieves pressure and alleviates pain.

Raising the header of the bed to assist with sitting up.

Bed Height Settings

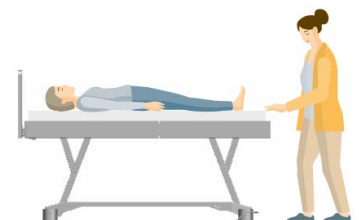

A low height of about 25 cm prevents fall injuries.

By adjusting the mattress base to suit the individual, residents can get up much more easily on their own. The bed automatically makes a stop at the ideal height of 38 cm for getting out of bed.

Depending on the model variant, the highest position is between 80 and 83 cm – ideal for back-friendly working at hip height.

With the Vario Safe system, the headboard and footboard can be removed without tools. This relieves the strain on care staff when performing personal hygiene, physiotherapy and advanced care.

COMFIMOTION ACTIV CARE BED

The Activ Care bed combines the best of in-home care functionality, positioning, and low height safety with luxurious and contemporary style for enhanced comfort, care and wellbeing. Four function electric bed with Reverse Trendelenburg.

- Minimum platform height of 195 mm reduces falls risk, improving user safety
- Programmable single button press ensures perfect bed height to maximise independence
- Under Bed Clearance provides clear access for patient lifters and overbed tables
- Battery Backup, Night Assist, Illuminated Handset.
- Massage: Relaxing vibration modes for personalised neck, shoulder and back relief
- Memory Function: Allows the user to set and return to their preferred positions at any time with one click of a button

Available in Long Single, King Single, Long Double and Queen.

COMFIMOTION CARE BED

The Care adjustable has a high lo function and assists with the manual handling of the user and mitigates fall risks. Select from multiple position options to assist in improving postural support and can ease symptoms of reflux, respiratory conditions, snoring and sleep apnoea.

- Clinical Positioning: Raises back and legs to alleviate cardiac exertion, improving resting comfort.
- Lockable Castors: Four heavy duty castors.
- Leg Raise: Promotes circulation, relieving tired, swollen, fatigued or painful limbs.
- Zero Gravity: Helps to relax the circulatory system and muscles of the lower back.
- Seated Position: Assists with bed entry and exit and upright dining.
- Trendelenburg (and Reverse): Can assist care givers when repositioning a user.

**** Also available in companion set up. Long Single and King Single only.**

TERENO FLOORLINE BED

The Tereno bed is designed as a versatile solution for everyday needs, offering a floor-level design that enhances patient safety by minimizing the risk of falls while promoting independence by allowing freedom of movement. It balances the essential need to protect those requiring care with the necessity of providing ergonomic working conditions for caregivers. The Tereno meets these needs with its superior comfort and support for mobility, making a significant contribution to the long-term health and quality of life of patients.

Health challenges, such as managing individuals with living with dementia who tend to wander, can be difficult. Without proper safeguards, these patients are at an increased risk of frequent falls.

The Tereno bed addresses this issue with a floor-level height of just 15 cm, significantly reducing the risk of serious injury.

In the unlikely event of a fall, the patient would simply roll onto a crash mat, minimising harm. The bed's side elements extend almost to the floor, providing additional protection and preventing entrapment underneath.

For added safety, the Tereno can be equipped with the Easy Switch Rail System, which allows telescopic split safety sides to be quickly attached or removed in seconds.

SPECIFICATIONS

Safe Working Load	225 kg
External Dimensions	104 x 211 cm
Mattress Base In cm	90 x 200 cm
Mattress Base Height	15 - 80 cm
Ground Clearance	15 cm
Backrest Angle	70°
Thigh Rest Angle	40°
Trendelenburg Angle Max	12°
Reverse Trendelenburg Angle Max	12°

The pivoting safety side is designed with ease of use in mind. It covers 50 percent of the mattress base length and provides standard-compliant protection but still allows the resident to get out of bed at the foot end. The stylish handrail serves as a comfortable surface to sit on at the edge of the bed.

Carers can operate the pivoting safety side effortlessly with one hand, saving both time and energy. Has a protective height of 45 cm,

- Removable headboards and footboards facilitate care, physiotherapy and medical treatment.
- With a choice of all types of headboard and footboard, wood decors and upholstery available from the Stieglmeyer collection, the Tereno can be customised to become your ideal bed.

The Fowler position promotes healthy breathing and helps to keep the body supplied with oxygen.

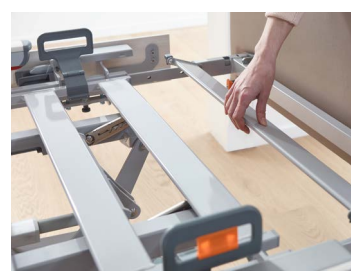

Additional protection from fall-related injuries is available in the form of our fall protection mat, which is made from 3 cm-thick composite foam.

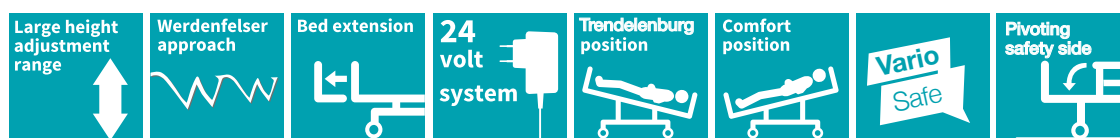

Vario Safe height-adjustable split safety sides are available in a choice of two lengths:

- Two elements with lengths of 90 and 110 cm can be freely combined or used separately
- Use of the 90 cm element at the head end provides reassurance and orientation and leaves ample space to get in and out of bed

It is also suitable for use with higher airflow mattresses. For residents requiring enhanced protection, a telescopic variant is also available. This is easy to extend horizontally to protect virtually the entire length of the bed. An optional infill piece is available to close the remaining gap at the foot end.

The mechanism for releasing the bed extension is activated by unscrewing and removing the securing screws without the need for tools.

CASERO BED

Features of the Future

Sleeping Surface	1070 mm x 2000 mm
Height Range	110 mm - 740 mm

STANDARD ELECTRIC BEDS

THE DYNAMIC
FLOORLINE BED

140601

The Floor-Line bed is specially designed to lower the more vulnerable patient to floor level, thereby negating the need for side rails. The bed was developed with the focus wholly on patients requiring special care and at risk of falling from a bed and sustaining injuries. The ability to lower the mattress platform to the floor lessens the chance of injury when falling. In addition, the mattress platform can be raised making transfers in and out of the bed and nursing care, easy and safe.

Also available in King Single.

SINGLE

Safe working load	200kg

Max. User Weight	175kg
Recommened Mattress size	198 x 105cm

THE DALI ECONOMIC

The Dali is one of Europe's best-selling care beds thanks to its innovative technology and longevity.

It is a robust and low-maintenance bed made of high-quality materials. The 4-section mattress base is operated conveniently with a wired hand controller.

Thanks to the reverse-Trendelenburg feature included as standard, the bed can be adjusted to a healthy sitting position for eating or watching TV. If the carer wishes to block certain positions for the resident, this can be effortlessly achieved with the help of the handset.

You can upgrade to The Euro size if you need a wider laying surface. An Optional bed extension that offers tall people the length they need to feel comfortable can also be installed (safety side bars are also available in 220 cm lengths that fit the bed with an extension).
