MATTRESSES

Your home. Your health. We care.

MATTRESSES - ICON

The Icon Homecare Mattress provides the perfect combination of special care, unparalleled comfort, and longevity for low-medium risk users. The tried-and-trusted design of the Icon offers excellent pressure injury prevention, safety, mobility and independence without compromising user comfort, satisfaction and improved rest.

Available in Soft, Medium and Firm configurations and in Single, King Single, Double, Queen and Split Queen sizing.

This ensures the Icon is a perfect ready-made solution.

FEATURES

- Looks and feels comparable to a conventional mattress
- 4-Way stretch conforming open weave
 - For optimal pressure redistribution, immersion and envelopment
 - Compliments multi-tiered foam structure.
 - Anti-friction and anti-shearing for protection of vulnerable skin
- Superior breathability & micro-climate
- Variable Therapeutic Weight Support available from 28 kg right through to 300 kg
- Encourages air circulation which promotes healthy micro-climate conditions at the skin interface, ensuring excessive sweating is wicked away.
- Provides comfort especially to 'hot sleepers'.
- Allows moisture and humidity present within the foams to easily escape for improved foam performance and longevity
- Integrated zipper to allow cover removal
- Raw material manufactured and woven in Australia

Warranty does not cover incontinence or fluid related damage.

STATIC SUPPORT SURFACES

We offer a comprehensive range of static foam pressure-relieving mattresses designed to maintain Meriskin integrity and help prevent pressure injury, whilst delivering maximum comfort.

STANDARD DUAL LAYER – LOW RISK

The Standard Dual Layer Mattress is an economical low risk foam mattress which is ideal for general use in the home or care environment.

- Dual Core Design
- Inbuilt Convoluted upper layer provides excellent comfort and facilitates internal mattress circulation
- Quality base support layer to provide good sleeping posture and comfort
- Quality Pressure Care Cover - 4-Way Stretch Vapour
- Permeable, Anti-Shear Pressure Care Upper

Single	198 x 88 x 15 cm
King Single	198 x 105 x 15 cm
Max. User Weight	135 kg

DELUXE TRIPLE LAYER – MEDIUM RISK

The Deluxe Triple Layer Mattress provides even pressure distribution and support for the patient. With profiled hinged strengthened sides, the mattress will conform seamlessly to any required bed position.

- Upper Immersion Layer alleviates localised pressure points
- Mid layer is made of high quality foam providing exceptional comfort and postural support for patient care
- Firm base layer provides protection against “bottoming out” during transfer and repositioning
- 4-Way Stretch, Vapour Permeable, Anti-Shear Pressure Care Cover

Single Size	198 x 88 x 15 cm
King Single Size	198 x 105 x 15 cm
Max. User Weight	150 kg

IC30 GEL-INFUSED ACTIVEX™ MATTRESS – HIGH RISK

The IC30 Gel-Infused ActiveX™ Mattress is temperature and pressure sensitive, which provides an optimum balance of immersion and envelopment, creating a sleep surface with excellent support, comfort and very high level of pressure care.

Designed with charcoal and firm edge support, this mattress offers exceptional comfort, support, and pressure relief for a restful night's sleep. The gel infusion helps regulate temperature, ensuring a cool and comfortable sleep surface, while the charcoal works to absorb odours and moisture, promoting a clean and hygienic sleeping environment.

Single	190 x 90 x 20 cm
Long Single	203 x 90 x 20 cm
King Single	203 x 107 x 20 cm
Double	190 x 135 x 20 cm
Queen	203 x 152 x 20 cm
Split Queen	203 x 75 x 20 cm
Junior	180 x 80 x 20 cm
Max. User Weight	150 kg

SOVEREIGN S7 – GAME CHANGING FOAM INNOVATION

This is one of the most advanced, high-performance static support surfaces. Delivering effective patient immersion, shear relief, infection control, durability, patient comfort, nursing support and many other benefits.

- Memory foam gel upper layer equalizing pressure redistribution
- High support edges for safe transfers and repositioning
- Ultra high rebound foam technology makes it easier to roll and reposition
- Vapour permeable, anti shear cover
- Dual zoned depth provides postural support and enhancing circulation
- Firm base layer for ultimate durability

Advanced Pressure Redistribution

- Airoform memory foam gel upper conforms naturally to the shape of the body for optimal contact with the surface and equalized pressure redistribution.
- Individual cells within the adaptive Ventraflow® layer contour to the body profile for deep immersion and envelopment of bony high-risk areas.
- Cells are zoned to ensure support is posturally aligned. Pressure redistribution is maintained relative to the applied weight in the area.

Reduced Friction/Shear

- When the skin sticks to a surface during body movement, it creates a force that stretches the tissues beneath the surface, known as 'shear'. As a major contributor to pressure injuries, mattress selection with insufficient shear protection will impact skin integrity.

Shearing is addressed with the following features:

Multiple Anti-Shear Layers

- transfers shear forces deep within the mattress.

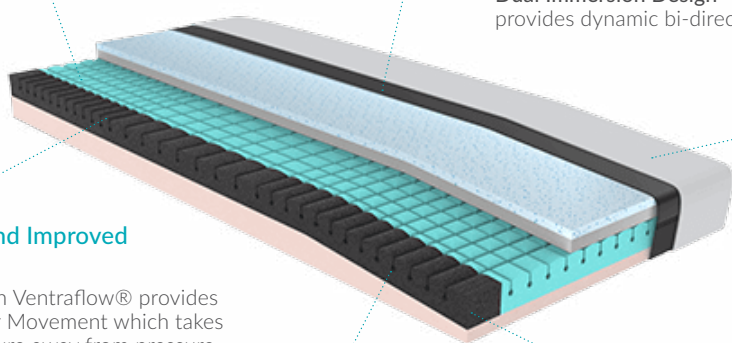

Compartmentalised Design

- keeps immersion layer aligned with the user throughout full bed movements. Lycra, high-stretch breathable SuperShear® inner cover allows controlled movement between mattress layers.

Dual Immersion Design - Ventraflow® engineered foam technology provides dynamic bi-directional absorption of micro-movements.

Breathability and Improved Micro-Climate

- Next generation Ventraflow® provides unrestricted Air Movement which takes heat and moisture away from pressure areas with the unique Air Channel System.
- Full Side-to-Side and End-to-End air flow channels balances internal mattress conditions with external temperature and humidity, minimising localised hotspots.

Mobility, Independence & Ease of Repositioning

- Ultra-high rebound foam technology makes it easier to roll and reposition.
- The unique response technology within the anatomical Ventraflow® system and Airoform® layers ensures high reactivity to movement, resulting in immediate response to posture changes without compromising on pressure care.

Heel slope

- A subtle integrated heelslope at 5 degrees gently transfers pressure away from the critical heel region.

Safety and Falls Prevention

- Proprietary technology integrates high-support foam within the engineered Ventraflow® system, creating high support edges for safe transfers and repositioning without compromising breathability.
- Inbuilt strengthened sides provide structural support during transfers.

Single	198 x 88 x 15 cm
Long Single	203 x 88 x 15 cm
King Single	198 x 105 x 15 cm
Double	198 x 135cm x 15 cm
Queen	198 x 153cm x 15 cm
King	198 x 185 x 15 cm
Max. User Weight	250 kg

ICARE MATTRESSES

IC15 - FIRM ACTIVE X MATTRESS

Available in Single, King Single, Double or Queen.

The IC15 firm mattress offers support and comfort. Firm feel makes it easier for turning. Suitable on any base or platform.

IC20 - MEDIUM ACTIVE X MATTRESS

Available in Single, King Single, Double and Queen.

Middle of the range, the IC20 proves to be popular for most. The medium feel provides a soft feel but excellent support. This IC20 medium mattress is heat and pressure sensitive which means that as it gets warmer it becomes softer. So when there is a pressure point developing which usually gets hot and inflamed, this area of the mattress will become softer, allowing the blood to flow freely again.

IC25 - SOFT ACTIVE X MATTRESS

Available in Single, King Single, Double and Queen.

For clients who like a soft mattress, or who spend a long time in bed. The feel of the IC25 soft Mattress is best suited to aged or petite patients. The IC25 Mattresses have almost no partner disturbance or roll together.

ICARE LATEX MATTRESS

Available in Single, King Single, Double and Queen.

The Latex mattress is a low-risk pressure mattress with a firm feel, but provides unique bounce-back support which makes it easy for transfers. Suitable on any base platform.

COMFIMOTION MEMORY FOAM MATTRESS

Available in Single, King Single, Double and Queen.

- The ComfiMotion Memory Foam mattress contours to the user's body, providing personalised comfort and transitional pressure relief.
- Integrated side-walls increase roll resistance at the bed edge and assist users, partners or carers with extra rigidity to ease bed entry and exit.
- Contoured Immersion: Specially layered memory foam provides contoured immersion for support and pressure relief.
- Superior breathability: Up to 8x more breathable than conventional memory foams.
- Anti-microbial: Environmentally safe treatment is added to the foam which reduces odours and kills 99.9% of bacteria.

COMFIMOTION POCKET SPRING MATTRESS

Available in Single, King Single, Double and Queen.

- The ComfiMotion Pocket Spring mattress offers zoned support springs that respond and contour to the individual body shape to improve comfort, maximising support and sleep quality.
- Transitional layered pocket springs arranged in weight activated support zones.
- Integrated side-walls create roll resistance at the bed edge and provide extra rigidity to ease bed entry and exit.
- Luxuriously soft pillowtop layer provides a plush immersive feeling complemented by the responsive pocket springs.

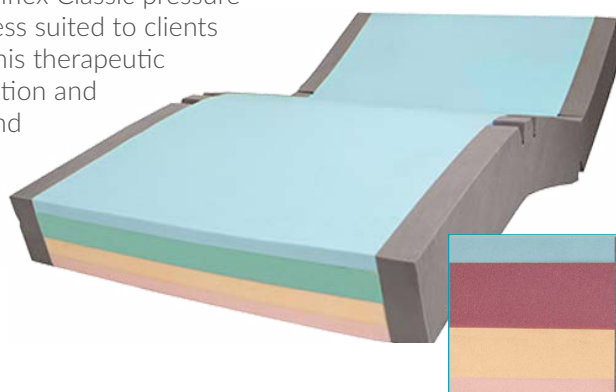

STATIC SUPPORT SURFACES

ICON MAXX 350KG

The Icon Maxx 350kg mattress is a 4-layered static foam bariatric mattress with firm hinged strengthened sides, triple segmented base, and Advantiflex Classic pressure care cover. The Icon Maxx 350kg is a high performance mattress suited to clients between 90-350 kg with a medium risk of pressure injuries. This therapeutic weight loading is achieved through 18 cm of the careful selection and grading of pressure redistributing, high comfort, supportive and foundational foam grades.

Available Single, Long Single, King Single, Double, Queen.

Single Size	198 x 88x 15 cm
King Single Size	198 x 105 x 15 cm
Max. User Weight	350 kg

ICON MAXX 500KG

The Icon Maxx 500kg mattress is a 4-layered static foam bariatric mattress with firm hinged strengthened sides, segmented base, and Advantiflex Classic pressure care cover. The Icon Maxx 500kg is a high performance mattress suited to clients between 120-500 kg with a medium risk of pressure injuries.

This therapeutic weight loading is achieved through a 20 cm premium specification and grading of pressure redistributing, comfort, supportive and foundational foam grades. The base two foam layers are split into three segments to allow the firm mattress to contour effective on a profiling bed.

Available Single, Long Single, King Single, Double, Queen.

Single Size	198 x 88 x 15 cm
King Single Size	198 x 105 x 15 cm
Max. User Weight	500 kg

PADDED BEDRAIL PROTECTORS

Super soft Bed Rail Protectors are designed to protect patients from injury through limbs striking or getting caught in metal bed rails. Made from soft, medical grade foam cushions covered with a soft two way stretch PU cover including an easy secure Velcro closure for secure attachment. Can be used on both static and collapsible bed rails, the Bed Rail Protectors allow easy access to the bed rail mechanism and can be easily wiped clean. **Available in two sizes.**

Standard	Folded Height 335 mm Length 1260 mm Thickness 25 mm
Large	Folded Height 490 mm Length 1580 mm Thickness 25 mm

BEDSIDE SAFETY CRASH MAT

Three sections of safety foam covered by a hinged nylon cover are designed to be placed on the ground beside the bed to assist in preventing injuries to patients rolling out of bed. Especially useful with hi-lo beds where nursing protocols prohibit the use of side rails.

The mat can fold up with ties for easy storage when not required.

PRESSURE CARE AIR ALTERNATING MATTRESSES

When choosing a mattress, it is important to consider its effect on skin protection. Pressure care mattresses may be either static or dynamic. In general, a static mattress refers to a mattress that doesn't move when a person lies on it.

A dynamic mattress is powered by a control unit to regularly change the surface beneath a body.

A pressure relief mattress is essential equipment for anyone at high risk of developing pressure ulcers or who has existing pressure ulcers.

All our mattresses use alternating pressure. This means that air is pumped into cylinders that are placed parallel to each other inside the mattress. As one set of cylinders inflates, the other set deflates. This way the pressure under any part of the body is relieved on a regular basis. Achieving an exceptionally high standard in pressure management, they operate by a sequence of air cells gently inflating and deflating in accordance with established alternating principles.

CARILEX 5 OVERLAY

This is an alternating air overlay system that offers a combination of alternating and static features for low to medium risk patients. The Carilex 5 air alternation overlay offers advanced features such as low pressure alert and internal pressure monitoring.

- *Intelligent Pressure Sensing Technology*
- *Low pressure alarm*
- *Auto-set – no need to input weight, with ability to manually adjust for patient comfort*

Available in Single and King Single.

Maximum User Weight: 250 kg

CARILEX 8 REPLACEMENT - LOW TO HIGH RISK

A superior air alternating pressure mattress replacement system. Offering maximum comfort with Intelligent Pressure Sensing Technology (IPS) responding to patient movements by automatically adjusting internal mattress pressure.

Available in Single and King Single.

CARILEX DUALFLEX HYBRID MATTRESS - LOW TO HIGH RISK

The DualFlex Hybrid mattress is a dynamic replacement mattress system when patient comfort is of upmost priority. The Hybrid combines both high performance static foam and active alternating air cell technology for exceptional patient comfort and healing. This mattress caters to both higher or lower risk patients all in one, offering a cost-effective, pressure-relieving mattress solution that caters to patients as their needs change.

Specifically developed for patients at 'High Risk' of developing pressure ulcers, this high-performance foam layer features a zonal area design, including GELTEX® inside technology, to provide effective redistribution of pressure on the sacrum, head, shoulder blades and heel areas. Alternating therapy can be quickly and easily applied by connecting the ultra-quiet pump, whilst still providing a peaceful sleeping environment.

- *Intelligent Pressure Sensing Technology*
- *Low pressure alarm*
- *Auto-set – no need to input weight, with ability to manually adjust for patient comfort*

Available in Single and King Single.

Maximum User Weight: 250 kg
