HOME HEALTH CARE

FALLS PREVENTION

Your home. Your health. We care.

FALLS PREVENTION

Keeping patients happy, safe, comfortable, and independent in their own homes is essential. Falls in the elderly not only increase the risk of hospitalisation but also lead to significant health decline. In addition to physical injuries, the psychological and social impacts of falling can be just as severe. Those who fall may experience depression, anxiety, isolation, and a loss of independence. Falls are the second leading cause of hospital admissions due to injuries, and many older Australians never fully recover.

HIP SAVERS

HipSaver products restore confidence of motion to the elderly, both preserving physical health and increasing their mobility. HipSaver products are incredibly soft and very comfortable to wear, whilst offering the most effective superior protection.

HipSaver is available in a variety of designs to suit all types of wearer needs, ranging from the elderly in nursing homes, to those who daily participate in exercise programs and even robust activities like jogging.

Nursing Home Style

Designed for the mobility and comfort of residents, as well as convenience and peace of mind for caregivers.

90-HSNH

90-HSNHPOM

Slim Fit Style

Designed for optimum style and comfort, HipSaver SlimFit looks good, feels good, and pulls on just like regular underwear.

90-HSSFPOF

90-HSSFPOM

Open Bottom

90-HSTBPOF

Hip Measurement	Size
70 cm to 81 cm	XS (28" to 31")
82 cm to 92 cm	S (32" to 35")
93 cm to 102 cm	M (36" to 39")
103 cm to 114 cm	L (40" to 44")
115 cm to 127 cm	XL (45" to 50")
128 cm to 146 cm	XXL (51" to 57")

Hip Saver Pad

The HipSaver replacement pads are the only pad with airPad technology. They are designed to be worn in HipSaver pants only.

90-HSPADS

The Hip Saver range of products are endorsed by the APA and are put through a robust and rigorous process of assessment and peer review before being endorsed. The fact that the APA has endorsed HipSaver means that you can rest assured that you are buying a safe, effective, professionally-credible, high quality product.

FALLS PREVENTION

HEAD SAVERS

Reduce the risk of devastating head injuries with HeadSaver - the stylish, lightweight, comfortable head protector. One in three seniors aged 65 and older experience falls with 30 percent requiring medical treatment. Severe injury often results as the veins and arteries of older people are more vulnerable to a sudden blow or jolt to the head.

Available in a range of styles to suit all adults.

SLEEPSENSE

SleepSense is an innovative and cutting-edge bed sensor that revolutionises the way we monitor sleep and ensure the well-being of individuals. Utilising state-of-the-art high-precision sensors and advanced AI algorithm technology, SleepSense provides a comprehensive range of real-time information and features for enhanced care, monitoring and understanding of sleep health.

Unlike traditional bed mats, SleepSense offers the convenience of monitoring vital signs from a single device barely larger than the size of your hand. This portability allows for easy installation and versatility in different settings, such as homes, hospitals, assisted living facilities, or other care environments.

Features

- Central monitoring
- Uses AI algorithms and comprehensive features
- In and out of bed status for timely intervention
- Heart rate and breathing rate monitoring
- Sleep assessment and report
- Smartphone integration

MONITORS, SENSORS & ALARMS

Maintaining your duty of care is a lot easier with the Dynamic Falls Prevention suite of products. This state of the art system, offering floor, chair and bed mats, coupled with an alarm monitor is specifically designed for nursing home, hospital or home care environments.

The mats are connected to the alarm monitor by cord or wirelessly, so that when the floor mats are stepped on, or if the patients weight is fully removed from the chair or bed mats, that the monitor alarms and alerts the carer that the patient is moving.

Features

- Simple operation and maintenance
- Adjustable Alarm volume and tone
- Alerts for low battery
- Can be connected to Nurse Call system
- Auto rearm after alarm activation
- Visual Alarm indicator
- Reset button (to silence the alarm)
- 1 year manufacturer's warranty on alarm and floor mat
- Operates on 3 AAA or AA batteries (not included)

Activates an alarm if the buckle is released.

PERSONAL ALARMS

MINDME PRO SM

Around the house, at work, or out and about, the MindMe Pro SM is the perfect welfare companion that places communication and assistance at the wearer's fingertips.

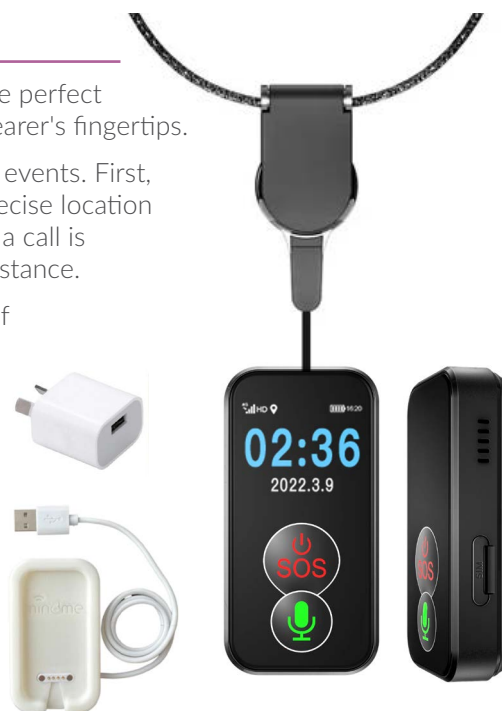

It's simple to use and the emergency procedure is a logical sequence of events. First, the SOS button raises an alert to contacts with a text of the wearers precise location and begins cycling through contacts, calling until answered. Then, once a call is answered, the wearer and respondent can communicate to provide assistance.

Suitable for the Elderly, people with disabilities, people in early stages of Alzheimer's and dementia.

Full setup included with

- SIM Card
- \$30 Credit
- Emergency Contacts
- Fall Detection
- Geo-Fencing
- MindMe can also install a pre-loaded SIM so the device can be used straight away.
- 1 Touch SOS Button
- Operates Almost Anywhere in Australia (4G Network)
- Set up to 3 Emergency Contact Numbers

- 2-way Communication
- Real Time location via GPS Satellite
- Powerful Microphone & Speaker
- Auto Answer Incoming Calls
- LED light
- Remote Setup via Free Mobile Tracking APP
- Mobile App (iOS & Android)
- Geo Fencing
- Fall Detection
- Operates in the shower
- Low Battery Alert

Fall Detection

When a fall is detected and the wearer does not move for 10 seconds, Mind Me will automatically send an SMS alert to the emergency contacts.

One Button Operation

When the SOS button is pressed Mind Me will send an SMS to the emergency contacts with a Google Maps link and then ring the contact numbers until the call is answered.

2-Way Hands Free Communication

When an emergency call is answered, the wearer and the contact can have a 2-way conversation. The contacts can also ring the Mind Me at any time to talk to the user.

Built-in GPS

When the SOS button is pressed, an SMS and a link to Google Maps is sent to the contacts. When the link is pressed the location of the wearer is shown on Google Maps.

Use in home or when out & about

Mind Me works wherever a mobile phone or GPS works. Whether the wearer is at home or out and about, they will always be in contact with the family or carers.

Geo-Fence

If the wearer tends to wander, a geo-fence (boundary) can be set up so when the fence is breached a SMS alert is sent to the contacts.

MINDME WATCH X

The MindMe Watch X combines mobile communication, GPS capabilities, and GPRS satellite technologies with fall detection and a simple interface into a compact smart watch.

Full setup included with

- SIM Card
- \$30 Credit
- Emergency Contacts
- Fall Detection
- Geo-Fencing
