CLOCKS

Your home. Your health. We care.

ORIENTATION CLOCKS

A range of highly visible, easy to read clocks aimed to assist people with dementia and those with cognitive impairment. Memory loss is often the first symptom to appear in someone suffering from dementia or other cognitive impairment. The use of orientation clocks may assist with this problem. These clocks are suited to people with varying degrees of cognitive impairment with the need to be reminded of the day, time or date.

58-0202

Analogue Clock with Automatic Calendar

This clock is popular in the home as an invaluable reminder for day/time. Featuring a 300mm analogue clock-face and day/date calendar, it can be read up to 15 metres distance.

580200

Large Digital Calendar Clock

This Automatic Calendar Clock has an easy-to-read time and date display and the day of the week is spelt in full. This slimline white clock can be wall mounted or can sit on a flat surface using the built-in stand. There is the option of 12 or 24 hour format and also an alarm function.

580204

Digital Clock with 7.5" LCD Display

The Digital Clock is ideal for Australians living with Alzheimer's and Dementia, or those with sight impairment. The clock features a large 7.5" LCD display, non-abbreviated display of day, date, month and year, as well as versatility in mounting options.

58-0201

Automatic Calendar Clock

This popular calendar clock features a 70mm analogue clock-face and day/date calendar. Includes a reliable German movement and the automatic calendar function self-adjusts for leap years. The flip card display remains readable under fluorescent lighting and can be viewed from 10 meters away. Clock can sit on a flat surface or be wall hung.

Wake N Shake - Loud Alarm with Jumbo Display

The Oricom wake 'N' shake alarm clock is an ideal wake up call for persons who are hard of hearing and/or suffer from low vision. Use it as a stand-alone alarm clock or connect it to your phone and it becomes an extremely loud alarm ringer, with flashing strobe light, vibrating shaker and a jumbo high contrast display for easy reading in low light.

Dementia Calendar Clock

58-0208

Mains powered LED clock clearly displaying digital time, date, month and year in large print at a glance. The high quality non-reflective LED screen has day/night mode to change brightness automatically according to time of day. The LED can be set to white or yellow.

Settings include reminder alarms, language choice, volume levels and date format. This white framed clock has an adjustable stand to allow for the clock to sit on a flat surface or be wall mounted.
