

**STATEWIDE**

HOME HEALTH CARE

**Independent living and  
rehabilitation equipment.**

Your home. Your health. We care.

**PRODUCT CATALOGUE**

*"At Statewide, we pride ourselves on our ability to understand our product offering: customer service. The experience of our customers is the most crucial element of what we do. Some of the decisions our customers make can be life-changing.*

*By constantly renewing and improving our range, we ensure that our clients have access to the latest products. These products have been carefully sourced and tested to ensure that they meet all the necessary national and international standards. We pride ourselves on our product range, pricing and the way our knowledgeable and experienced staff are able to assist health professionals, patients, family members and carers. We never take for granted the positive impact we can make through the products we offer. "*

**Managing Director Timothy D Cohen**

*Statewide Home Health Care is a family-owned business that grew from a small section of Rodney Cohen's Acland Street Pharmacy. Originally named St Kilda Home Health Care, the store opened in 1992 and was based in Barkly Street, St Kilda (Melbourne) just around the corner from the original pharmacy.*

*In 1995, Rodney's son Timothy took over the business. He renamed the store and moved it to the present location at 501 Nepean Highway, Brighton East. In December 2009 Peninsula Home Health Care was opened in Seaford to deliver product solutions to the Mornington Peninsula and the Westernport area.*

*Statewide have an excellent reputation in the Healthcare sector for providing their unsurpassed brand of customer service, coupled with product solutions to Allied Health Professionals, their patients and the general public.*

*The business' expertise extends to equipment hire, trials, mobile equipment repair service, home modifications (rail installation services), and web based ordering solutions.*

*Statewide staff strive to recommend the most suitable equipment whatever your requirements and when appropriate will always refer clients to health professionals.*

*Whatever your needs, be assured that the Team at Statewide Home Health Care will always provide courteous, patient and informed customer service.*

*Statewide offers complimentary delivery to hospitals that are a party to our service agreements. For a minimal charge, we offer same-day delivery service throughout the Melbourne Metropolitan Area.*

*If you're a health professional, carer, key decision maker or responsible for your facility's procurement, you will find this catalogue a helpful resource. Patients, family and carers are welcome to visit our modern and spacious showroom to experience first-hand the extensive range of Home Health Care products on offer.*

*This catalogue provides a detailed overview of our product range. Visit [www.shhc.com.au](http://www.shhc.com.au) to peruse the Statewide website which provides in-depth product specifications, and an online shopping solution with delivery throughout Australia.*

# USEFUL INFORMATION

## ***On-line Ordering***

The general public are welcome to order from our Ecommerce store located on our website. For Health professionals, we have developed a suite of on-line ordering tools that can also be accessed through our website.

## ***Showrooms***

Patients, family, healthcare professionals and carers are welcome to visit our modern and spacious showrooms to browse through our extensive range of Home Health Care products.

## ***Hire Equipment***

We offer the most comprehensive rehabilitation equipment hire service in Melbourne, the Mornington Peninsula and Westernport region. All of our equipment is sanitized after every use with Hospital Grade disinfectant. Our customer service team are always on hand to discuss your booking with you.

## ***Grab rails and Home Modifications***

Our registered builder is available to provide a range of Home modification services across the Melbourne Metropolitan area, the Mornington Peninsula and Westernport region. The service includes the installation of grab rails, Magnetic door catches, Shower screens and hand held showers.

## ***Logistics Management***

We offer a timely delivery service throughout Australia. By managing your order all the way to your door, we ensure that every aspect of the transport arrangements runs smoothly.

## ***Repairs***

Our repairs department is always available to assist. We specialise in both workshop and mobile servicing and repair of rehab equipment including power chairs, pressure mattresses, hoist, electric beds, mobility aids and bathroom equipment.

## ***Department of Veterans Affairs***

We have been proudly serving the Veteran Community for more than 20 Years. By joining forces with Brightsky Australia we can assist you with the provision of any product available under the Rehabilitation Appliance Program.

## ***Equipment Trials***

We provide complimentary equipment trials for the majority of our Medical Equipment. This offers patients, carers and health professionals the chance to evaluate the clinical outcomes provided by the introduction of equipment into the care environment.

## ***Equipment Installation***

If you are ordering a larger item, like a Hospital Bed, Hoist, Electric Recliner or Air Alternating Air Mattress, our Installation team are always on hand to assist.

## ***National Disability Insurance Scheme***

As a registered NDIS provider, we have the frame work in place to support you in reaching your goals and welcome the opportunity to discuss your needs in more detail.

## Knee Cruiser TKW-12

A Knee Walker is a comfortable, highly portable and manoeuvrable mode of transportation that provides great stability and energy efficiency over a small footprint. Recommended user weight: 130kg

## A more comfortable alternative to crutches

The Knee Walker provides the patient with more mobility, stability and comfort post-operatively when lower limb conditions prevent weight bearing.

Not only does a Knee Walker take less energy to propel on hard, level ground as compared with a walker or crutches, it also improves balance due to its broad base of support.

### Features:

1. Eliminates tripping or falling associated with crutches.
2. Less fatigue due to conserved energy
3. Frees up hands.
4. Prevents atrophy by strengthening proximal muscles in affected leg.
5. Provides stability for those with compromised balance.
6. Improves circulation in affected leg.
7. Partially elevates affected leg for less pain and swelling.
8. Can be used as a bench or foot stool during rest.
9. Folds in seconds for transport or storage (no need to disassemble).

### Knee Walkers are typically used for:

- Fractures of the foot, ankle, heel, or lower leg.
- Lower extremity ulcers/wounds (e.g., diabetic).
- Non-union fractures.
- Leg amputations.
- Ruptured Achilles tendon
- Sprained ankles.
- Bunions.
- Gout.

## Knee Cruiser Heavy Duty

Recommended User Weight: 200kg

## Post-Operative Footwear

### Cam Boots

(Controlled Ankle Motion)  
Provide protection, ankle stability and immobilisation for moderate to severe foot strains and sprains, post-surgery or removal of a cast. Comfortable soft foam with easy adjustment.

### Post-Operative Shoes

To protect foot and bandages post-operatively and provide secure non-slip footing.

### Cast Boots

To protect plaster cast from soil and moisture and provide secure, non-slip footing.

### EvenUp

Simple, fast, easy to apply the EvenUp™ uses a patented innovative design which helps to equalize a patient's limb length and reduce body strain while walking.

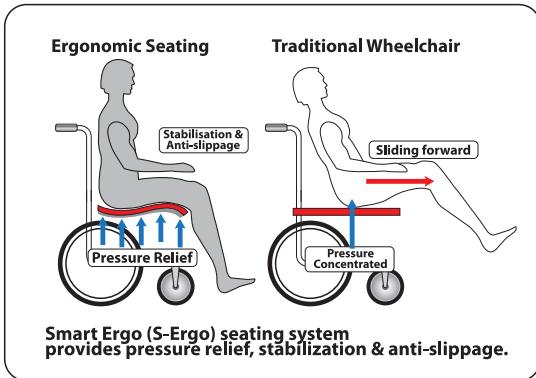

## PERFORMANCE, STYLE & COMFORT

The S-ERGO series of Lightweight wheelchairs feature Karma's unique S-Ergo shaped seating system.

The ergonomic 'S' shaped seat helps spread the load and prevents the user slipping down in the chair. The seat and backrest are made from a mesh upholstery that is great for keeping cool on summer days. The S-Ergo seat has been pressure-mapped for optimum shape. In addition the seating system benefits from the unique anti-bacterial technology

built into the upholstery that provides protection against odour, staining and deterioration caused by bacteria, fungus and other microorganisms

### S-ERGO LITE DELUXE

At 10.3kg the Ergo Lite Deluxe (with Self Propel) is the lightest self-propelling wheelchair in our product range. Equipped with Swing away removable leg rests, double cross braces for strength, durability and quality.

**THIS TOP OF THE RANGE IS ALSO AVAILABLE IN TRANSIT STYLE**

### S-ERGO 125 ▲

The streamline oval tubes not only make the wheelchair look great, but also strengthen the light wheelchair structure.

- Patented 'S' Shaped seating system
- Detachable pads treated with Aegis Microbe Shield
- Outrigged armrests to minimise overall width
- Wider ergonomic arm pads
- Wide footplates with flatter angle
- Swing in/out detachable footrest hangers
- Made from aircraft grade aluminium, frame breaks down to 10 Kg.

### ERGO LITE ▲

The Ergo Lite is a Lightweight aluminium transit wheelchair weighing just 8.7kg complete. The Ergo Lite is equipped with brakes at the pushing handles which can be locked on with a ratchet mechanism. It has detachable footrest hangers and is a great addition to our range of lightweight wheelchairs.

- Made from aircraft grade aluminium.
- The tyres and castors are puncture proof.

## Karma Lightweight Wheelchairs

The multi adjustable ECON 800 is a quality manual wheelchair. The folding aluminium alloy frame is lightweight and functional. The swing-away and detachable footrests can be adjusted to fit your body perfectly. Combine that with its flip back armrest for easy side transfers and you will notice how convenient it is.

*The Karma Econ 800 is available in both Self Propelled and Transit models.*

## Wheelchair Transit

This lightweight transit chair is an economically priced solution. Ideal for trips out and about. Transportation is simple, it has a slung padded backrest that folds down to fit into the car.

Standard Features:

- Aluminium frame (Burgundy) Nett weight 12 kg
- 2 x 12" Rear wheels
- Fold down attendant handles
- User lap belt
- Fixed full length padded armrests , Black nylon upholstery
- 18" (46 cm) seat width
- Detachable swing away footrests
- Maximum user weight capacity: 100 kg

## Premium Lightweight

This Premium Lightweight Self Propelled wheelchair offers full functionality to the user. Its swing away footplates allow for safe patient transfers. It folds easily for storage and transport.

- 18" (46cm) seat width
- 17" (43cm) seat depth
- Half folding backrest
- Net weight 12kg
- Maximum user weight 115kg

# ottobock. Start M2 Series

The Start M2 series is an ideal solution for patients who are sitting in a wheelchair for extended periods of time throughout the day.

A manual lightweight wheelchair, manufactured by Otto Bock, whose name is renowned through the Health industry, and stands for institutional high-quality and technologically outstanding products.

Combined with an excellent quality wheelchair cushion, the Start M2 can be configured to meet the individual postural requirements of the patient, which is very important from an ergonomic viewpoint, particularly if you are sitting in the wheelchair for the majority of the day.

All models of the start series are equipped with antibacterial push handles produced from ProvaMed. The antibacterial effect represents an important property especially in institutional domains for preventing the transfer of bacteria. (no wiping of handles required).

#### **Wheelchair Features Include:**

- Increased weight capacity to 130kg + Crash Tested
- Horizontal Rear Wheel Adjustment on all models
- Patented Quick Depth Adjustment (+/- 1 inch)
- Anti-Bacterial Push Handles (ProvaMed®)
- Improved Cross Brace Clips
- Asymmetric, reversible footplates
- Weight from 14.7kg (Transport weight from 9.6kg)

#### **Available in Three Models: Standard, Adjustable and Configurable.**

##### Seat Widths Available :

Standard	405 /455 /505 mm
Adjustable	380 /405/ 430/ 455/ 480 mm
Configurable	380 /405/ 430/ 455/ 480/ 505 mm

Options:	Side Panel with Height Arm Adjustment
	One Arm drive
	Armrest with swivel unit
	Elevating Footrest
	Amputating leg rest

# Tilt-In-Space Wheelchairs

## Rehab RS Classic Tilt-in-space Wheelchair

The Rehab RS is designed for a user who has limited ability to reposition themselves in a device and as a result, is at risk of pressure injuries.

- Tilt (26°) and backrest recline (30°) facilitates weight re-distribution and the preservation of skin integrity. It also optimises user comfort, decreases user fatigue and assists with head control.
- Adjustable seat depth and width.
- Height adjustable and removable armrests.
- Adjustable headrest.
- Heavy duty, padded, elevating leg rests (std).

- Elevating detachable leg rests with angle adjustable footplates, reclining height adjustable backrest with removable adjustable three part headrest
- Available in transit or self propel models
- Maximum user weight 140kg

## ROHO Medical Products

It's only air, but what we do with it makes a world of difference. There are no greater defences against wounds and disease than those contained in the human body.

But often these defences need an ally. A partner in the healing process. ROHO DRY FLOATATION technology is that partner. The soft, flexible, interconnected air cells that comprise ROHO DRY FLOATATION products are adjustable to provide a customised fit to a client's sitting or lying shape. As an individual's body shape changes, the cushion adjusts to facilitate blood flow.

### Quadro Select Cushion

The QUADTRO SELECT Cushion allows every user to benefit from a customised fit through the simple push of a knob. The revolutionary ISOFLO® Memory Control offers shape fitting capabilities while the user is seated, allowing quick and easy on-demand adjustment to maximise function. With the built-in stability and simplicity of the QUADTRO SELECT Cushion, no longer will you have to sacrifice maximum skin protection to get stability, positioning or convenience.

### The Harmony Cushion

By combining a lightweight and comfortable ROHO® AIR FLOATATION Cushion Overlay with a pre-contoured foam base, encased within a moisture resistant cover, you can maximise abilities, independence and freedom without the worry of adding unnecessary weight to the mobility system.

### The LTV Seat Cushion

The LTV Cushion lets you customise the seat to your specific comfort level. The LTV is made of individual, interconnected air cells that allow air to slowly transfer from chamber to chamber and evenly distribute body weight pressure.

### The Mosaic Cushion

The MOSAIC cushion is especially suited for users who require a cushion for basic level skin protection, support and comfort. Using air floatation technology, the MOSAIC cushion is not only comfortable, but the use of interconnected air cells to distribute forces evenly across the cushion allows it to be used effectively for low risk skin protection.

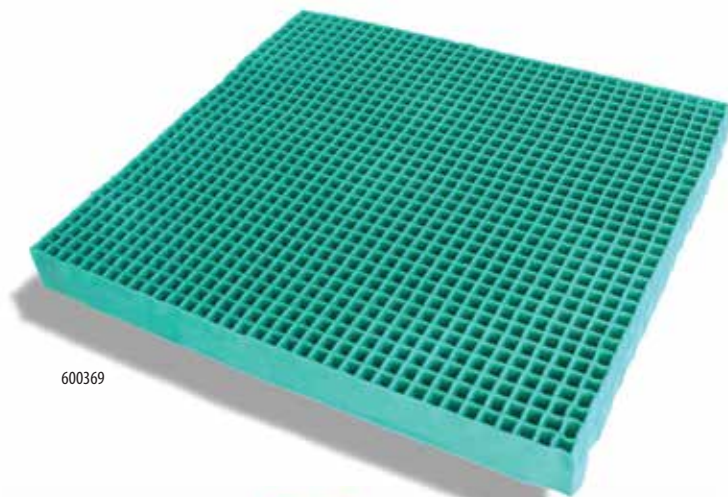

### Mattress Overlay

Medical mattresses play a critical role in providing the patient with the appropriate comfort and support. Each of ROHO's medical mattresses offer unique features, options and benefits. Therefore, it's very important to consider all the details and relate them to each individual's needs.

## EquaGel Medical Cushions

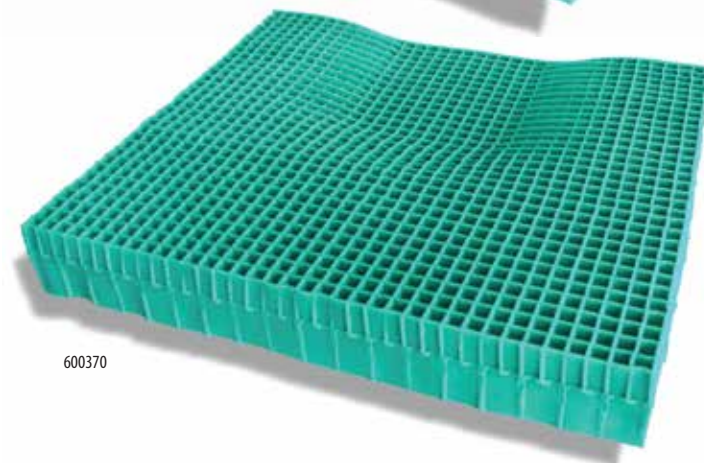

The Pressure relieving EquaGel Medical Cushion is made from a durable patented column-buckling gel technology. This allows body load spread by providing a reduced amount of contact area while permitting increased air circulation, therefore assisting with the dispelling of heat and moisture. Patients with poor mobility, hydration, nutrition and/or circulation will benefit from EquaGel, gel seat cushions for wheelchairs. Wheelchair Pressure Relief Cushions contribute to patient comfort and overall outcomes. EquaGel seat cushions are not inflatable and therefore they do not require adjustment and/or ongoing maintenance.

600369

### THE EQUAGEL PROTECTOR

- 100% EquaGel®
- 6.35cm tall EquaGel® in two stages
- Contoured pelvic area of the cushion for additional equalising pressure distribution while maintaining 4.5cm gel below pressure points.

600370

### EQUAGEL GENERAL

- 100% EquaGel®
- 5.08 tall EquaGel® in two stages
- contoured pelvic area of the cushion for additional equalising pressure distribution while maintaining 3.3cm gel below pressure points.

### EQUAGEL ADJUSTABLE

- 100% EquaGel®
- 6.35cm tall EquaGel® in two stages equalising pressure distribution while maintaining 4.5cm gel below pressure points.
- Included are two different pelvic contour inserts that increase the amount of therapeutic gel under the pelvis from 4.45cm to 5cm, 7cm, or 6.35cm deep.

#### All Cushions

- The top layer is thin wall gel and a tight grid for a comfort layer.
- The bottom layer is thicker wall gel and a wider grid for deep posture support.
- Fluid resistant, vapour permeable cover.

600371

**Designed to stabilise the pelvis, protect the skin and position the body, JAY's comprehensive range of wheelchair cushions are lightweight, low maintenance and can accommodate a wide range of mobility seating requirements.**

### **JAY UNION CUSHION**

The JAY® Union™ is a versatile, comfortable, skin protection and positioning cushion composed of a dynamic fluid and foam layering system, moisture resistant inner cover, and an anti-microbial outer cover.

**JAY Flow fluid and memory foam for high performance skin protection and positioning**

60JUNION

### **JAY FUSION™ CUSHION**

The JAY® Fusion™ is an adjustable cushion designed for skin protection that features JAY Flow™ Fluid or ROHO DRY FLOATATION® air insert options in a package that's comfortable, stable and supportive. It incorporates the stability of the J3 cushion with the pressure management of J2.

**Combines the J2's skin protection capabilities with the J3's maximum stability**

60JFUSION

### **JAY J2**

The JAY J2 cushion combines JAY foam, a JAY Flow fluid pad and various cover choices to provide outstanding comfort. The Jay J2 cushion is most suitable for clients who have moderate to aggressive postural needs, and require a high degree of skin protection .

60J24

Spenco® Chair Pad makes any chair, seat or car sitting surface more comfortable.

Spenco® Full Wheelchair Pad protects arms, torso and entire sitting surface.

600204

# Wheelchair Ramps

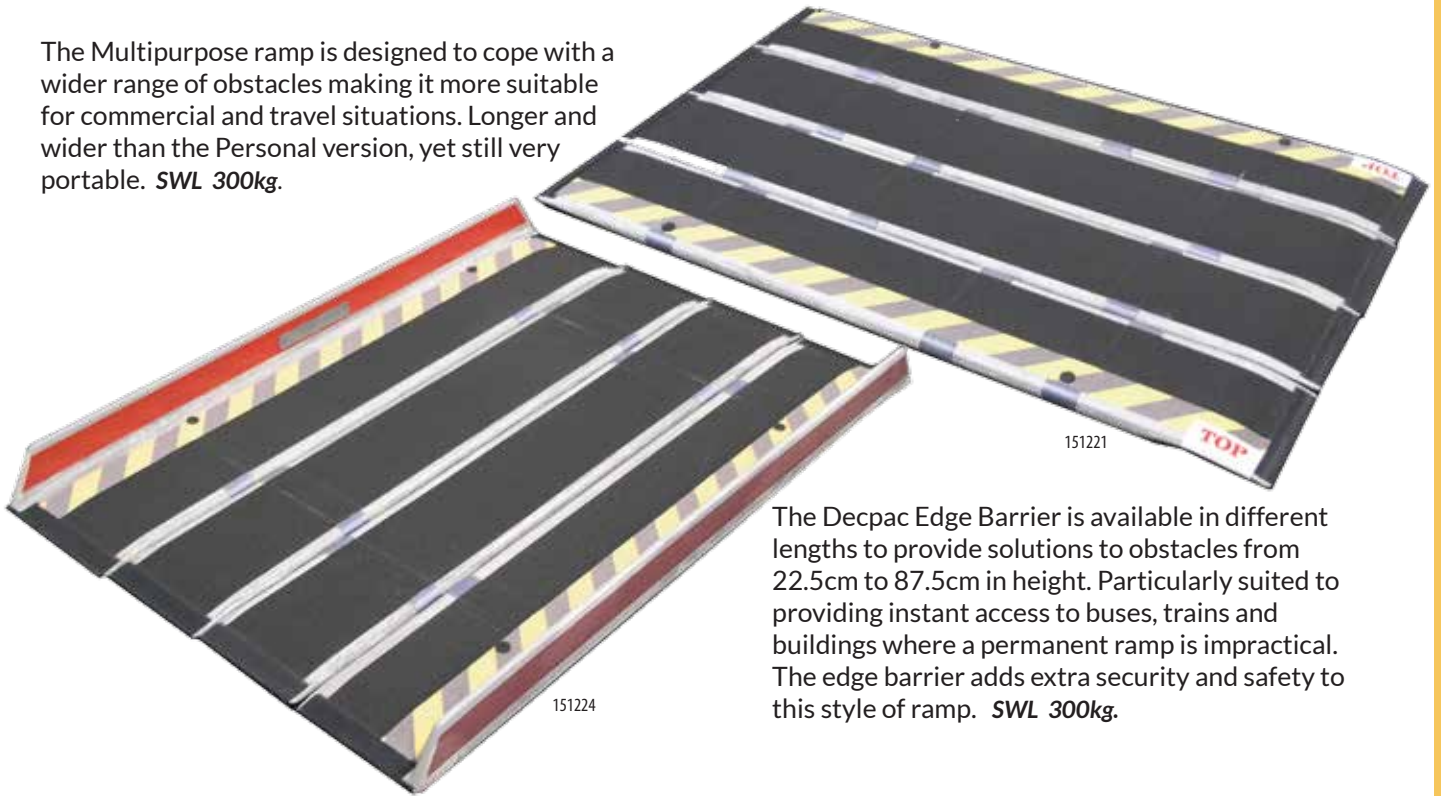

Rubber Threshold Ramps provide a durable, safe means of navigating uneven household surfaces including small steps and doorways.

A hidden dovetail locking system allows for easy installation and incremental ramp height adjustment of up to 3 inches. Modular design makes Rubber Threshold Ramps a practical and affordable home accessibility solution.

151207 - 1 INCH,  
151208 - 1.5 INCH, 151209 - 2 INCH  
151210 - 2.5 INCH, 151211 - 3 INCH

The Multipurpose ramp is designed to cope with a wider range of obstacles making it more suitable for commercial and travel situations. Longer and wider than the Personal version, yet still very portable. **SWL 300kg.**

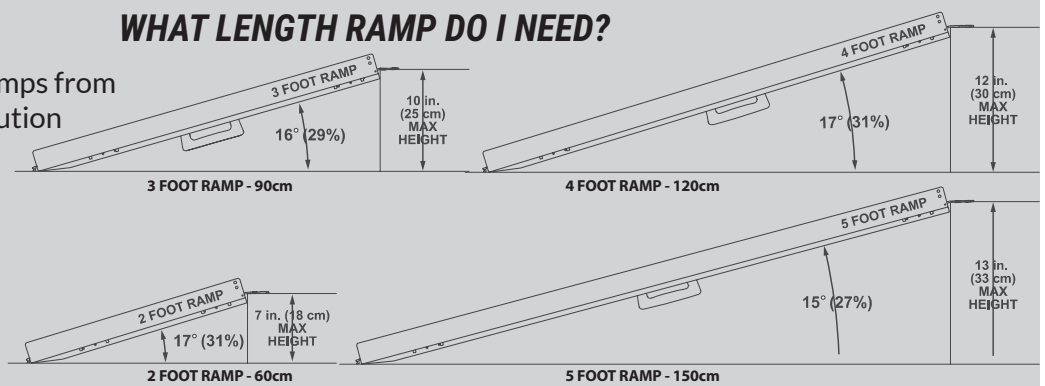

The Decpac Edge Barrier is available in different lengths to provide solutions to obstacles from 22.5cm to 87.5cm in height. Particularly suited to providing instant access to buses, trains and buildings where a permanent ramp is impractical. The edge barrier adds extra security and safety to this style of ramp. **SWL 300kg.**

The Senior Range offers you a flexible variety of ramps to cope with obstacles from 22.5cm to 87.5cm in height. Portable, lightweight and strong. **SWL 300kg.**

### WHAT LENGTH RAMP DO I NEED?

Silver Star single-fold ramps from Pride offer a reliable solution for transitioning curbs, thresholds and other obstacles. They are available in several different lengths. **SWL 227kg.**

# Folding Scooters

## QUEST 4 WHEEL MOBILITY SCOOTER

**Perfect Compact Travel Scooter.**

- Ideal for Holidaying, Cruise ships, Airlines or Caravanning.
- Unique 3-step folding design.
- Weighs only 25.8kg
- Front & Rear LED lights
- Lightweight lithium ION battery

**Max Weight Capacity: 115kg**

**Max Speed: 6km/h**

**Travel distance on full charge: 20km\*\***

### Etac Swift shower stool/chair

Swift is a prize-winning series of shower stools/chairs designed with functionality and simplicity in mind. The basic shower stool can easily be transformed to a complete shower chair, depending on the user's needs.

#### Stable on any floor

Swift has a unique construction that adapts to uneven floors thanks to the flexible seat. The soft high quality ferrules adapt to the floor and ensures a good grip. All these features contribute to the users safety.

#### Changes with the circumstances

Swift is adaptable to different needs. It is possible to start using the shower stool, and add arm supports and back support as the user's needs change.

- Seat height:** 42-57 cm
- Seat area:** 54x41 cm
- Total width, with armrests:** 54 cm
- Sitting Weight Limit:** 130kg

#### KEY FEATURES

- Sturdy plastic and aluminium design
- Anti-slip seat pattern for maximum patient safety and stability
- Soft seat pads available as optional accessory

**Bath Tub Transfer Bench**

Designed to provide a stable seat over the bath when bathing. Plastic seat and backrest provides a non-slip surface with holes for water drainage. Backrest and handle adjust to suit left or right facing baths without using tools. Built-in soap dish and hand-held shower slot for user convenience. Also available in a padded model.

100401

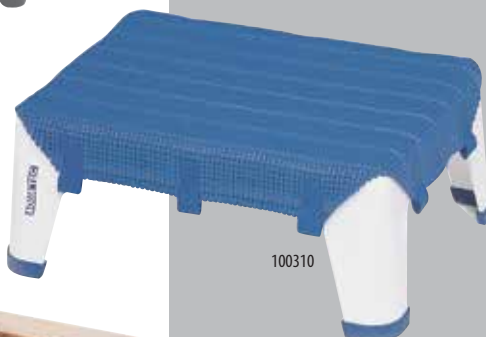

- Height adjustable seat: 43 cm - 56 cm
- Seat dimension: W 66 cm D 37 cm
- Max. user weight : 136 kg

100501

**Myco Swivel Bather**

The user sits on the seat from the side of the bath and then swivels over the bath for a wash or shower. The comfortable seat provides back and arm support and is ideal for people who feel insecure on a bath board.

100310

**Aquatec Bath Step**

The Aquatec Bath Step has a unique non-slip, removable, machine-washable cover to easily clean it while keeping your home hygienic.

**Wooden Bath Board**

**Economy Hand Shower**  
(Single & Double)

100510

**TRANSFER DISK**  
(optional accessory)

**Aquatec Orca Bath Lift**

*Enjoy a long soak and the therapeutic effects of a warm bath.*

The Orca is a battery powered bath seat that will lower and raise you in your tub. An emphasis on ergonomic design allows the Orca to sit lower and further towards the back of the bath, giving increased leg room for deeper and more relaxed bathing. The increased height of the backrest provides full support whilst upright or reclined. An ergonomic floating hand control contains the lightweight battery.

# Shower Accessories

**Chrome Hand Shower and Switchcock.** Designed for the shower as a permanent fixture.

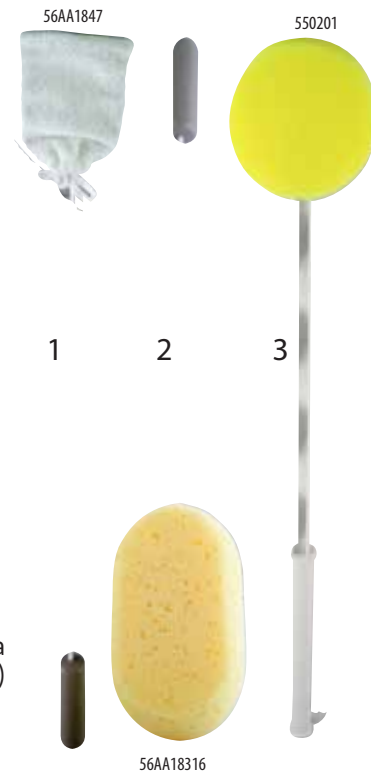

## Wall Mounted, Stainless Steel Grab Rails

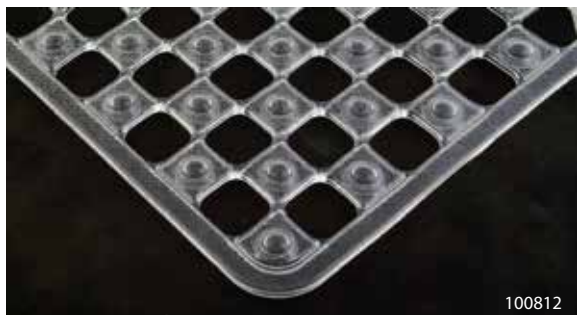

25mm & 32mm Highly polished or white powder coated with a flange (Available in 300mm, 450mm, 600mm, 750mm, 900mm)

## Suction Grab Rail

Offers a quick and easy non-permanent solution for more support when bathing or showering. Features suction indicators to show when the handle has been mounted properly and safely.

1. Long Handled Toe Washer  
2 & 3. Long Handled Sponges

## Bath and Shower Mat

The rubber mat is non-slippery and mildew-resistant for the shower and bath.

## Avivo Shower Sandal

Designed to clean the entire foot without any bending or stretching.

## Lotion & Cream Applicators

The applicator applies lotion smoothly and evenly, the extra long handle is perfect for hard to reach places.

## LimbO Cast & Bandage Protectors

The LimbO is designed to protect plaster casts and wound dressings from getting wet during bathing, it can also be used for swimming and hydrotherapy.

Removable applicator which can be filled with desired cream or lotion.

Over Toilet Seats provide a safe and stable raised seat to assist in toilet transfers. Ideal for those who require greater seat height. Frame is height adjustable to suit individual user requirements.

VÖLKER

## Healthcare Beds

The perfect combination of  
choice, style and functionality.

*Increasing feelings of independence is a crucial way of helping people regain their dignity and self-esteem which is why every element of the Völker range has been designed to ensure ease of use and provide a sense of security.*

By successfully combining form and function, Völker Healthcare beds can provide increased patient comfort while enabling caregivers to work safely and efficiently.

The unique Healthcare Design from Völker ensures that all beds fulfil their medical purpose while creating a home-like atmosphere that encourages patient wellbeing and recovery

*Völker Healthcare Beds are available in a range of designs and colours.*

# Designed for a home environment

## 5384 Kepler Low Height Bed

Increasing safety by minimising the risk of falls:

*The ergonomic design of the low-height bed combines light weight, high stability and a safe working load of 230kg.*

The 5384 Kepler provides maximum protection for residents who have an increased risk of falling out of bed.

Falls can lead to loss of independence, as well as having other negative implications in the care environment.

This versatile low-height bed can be lowered to 23cm\* and raised to a stable working height of up to 80cm\* to ensure a safe and ergonomic working position for caregivers.

The bed's close proximity to the floor when at its lowest position can give residents who are prone to falls, a greater feeling of safety and may also reduce the occurrence and severity of falls.

Double Castor's increase maneuverability and provide automatic braking for enhanced safety when the bed is in its lowest position.

*Available with the following lying surface sizes:*

*Single – 90cm x 200cm*

*\*Dependent on the configuration chosen*

*The under-bed light improves orientation at night. Controlled using the hand control unit (optional).*

*Designed for a home environment*

## 3080 Health Care Bed

Dignified care through increased mobility.

The Völker 3080 boasts a stylish design and the hidden retractable wheels and choice of colours means it looks great in the home, as well as in professional care environments.

This is a high quality, robustly built and precision engineered bed that will stand the test of time. It's fully height-adjustable making life easier for both users and carers. While the four-section profiling MIS® lying surface ensures users can make themselves comfortable whether sitting up or lying.

The bed can also be easily and quickly converted into a comfort chair position and the convenient handset means the user can be fully in control of all bed functions.

Another key feature is the unique handset controlled electric action locking castors.

The lying surface height can be adjusted from 40 cm to 80 cm ensuring a safe and ergonomic working position for caregivers and provision for easy and safe patient transferring.

*Available with the following lying surface sizes:  
Single - 90cm x 200cm  
Euro King Single - 100cm x 210cm*

# Exclusive Features

## *The Völker siderail patented system.*

The patented Völker siderail system is characterised by its exceptional versatility. It consists of separate elements that are split on both sides that move with the bed as its profile is adjusted. The rails can be adjusted to either one or two levels to ensure that the patient feels adequately protected from accidentally rolling out of the bed.

The siderails are highly versatile and robust. They can assist patient mobilisation by helping with transfers in and out of bed whilst ensuring users don't feel trapped.

## *Völker beds offer the following positions:*

### **\* ELECTRIC HI/LO**

*Flat Positioning - The lying surface can be adjusted on the 3080 Model from 40cm to 80cm.  
The 5384 Kepler Model can be adjusted from 25cm to 80cm.*

### **\* ELECTRIC BACKREST WITH CONTOUR ADJUSTMENT**

*Can be raised up to an angle of 70°(max).*

### **\* ELECTRIC KNEE-BEND WITH LEG LIFT FUNCTION**

*The upper leg section of the lying surface can be raised up to an angle of 45°(max).  
Lower leg section can be moved manually to any position(max 16° angle) by pulling the mattress holder.*

### **\* TRENDELENBURG AND REVERSE TRENDELENBURG POSITION**

*The position can be adjusted up to an angle of 12°.*

### **\* FOOT TILT**

### **\* COMFORT SITTING POSITION**

### **AND FEATURES**

*Safe working load 230kg*

*Built in slide-away safety assist rails.*

*Electric hand control unit.*

*German Made - complies with all European & Australian Standards,  
TGA Listed 10 Year manufacturer's warranty on bed frame and 2 years  
on motors & electrics.*

# VÖLKER

*Fully Maintained and Supported by our  
Australian wide Volker trained Technical team.*

## Comfortable- The Völker MiS® Micro-stimulation System.

The patented Völker MiS Micro-stimulation System is based on neuroscience principles, and detects even minor movements. The lying surface then feeds these tactile stimuli back through the mattress to the resident's body.

This continuous feedback increases body perception and promotes movement and blood circulation in the skin, improving the resident's comfort when sleeping or lying down, increasing mobility and reducing the risk of bed sores.

## Basal Stimulation

***"It's all about the base"*** The Volker Base (MiS ® Micro-stimulation System) assist carers with the concept of Basal Stimulation.

- Supports caregivers in implementing pressure sore prevention.
- Assists carers with the concept of basal stimulation.
- Supports caregivers with pressure management & risk assessment.
- Assists with somatic stimulation, controlling movement sensations relative to effort & weight.
- Promotes increased movement, stimulates the body & helps to reduce pain.
- Maintains restful & comfortable sleeping conditions.
- Helps to alleviate factors that facilitate chronic pressure sores.

"Basal Stimulation is a very comprehensive concept based on a holistic approach to health care. Taking patients reactions and preferences into account is expected to reduce stress, help the patient feel at ease, increase social interaction and independence, and give him the opportunity of sensory perception, movement and communication"

(Nydahl, P. 2005, Journal for Anaesthesia and Intensive bed handling, vol. 12, no. 1, pp. 244-245.)

Seven perception-areas are focal points: somatic-, tactile/haptic-, vestibular-, vibration-, oral/olfactory-, auditory- and visual perception. The most common approach is to use elements of Basal Stimulation, depending on the patient's situation. It is precisely the patient and his / her reaction to the Basal Stimulation or other care that is the linchpin of the whole concept: the nurse adapts the care to the patient's individual needs and circumstances. Over and above the concept of individualisation in Basal Stimulation, there are also specific goals:

*That the patient can maintain life and develop the following experiences:*

- *Feel his/hers own life*
- *Feel security and build confidence*
- *Develop his/her own rhythm*
- *Experience the outside world*
- *Maintain and establish personal relationships*
- *Make sense of his/her experiences*
- *Maintain control over his/hers life*
- *Experience autonomy and responsibility*

# Hospital Beds

## The Dynamic Hospital Bed

Our hospital beds offer the very best combination of build quality, functions and features available in a Homecare bed. The additional benefit of the height adjustable function, and many features adds to the safety of both patients and carers. With Steel Rail 160101S

**DELUXE**  
With Wooden Rail 160101W

# Dynamic Floorline Bed

The Floor-Line bed is specially designed to lower the more vulnerable patient to floor level, thereby negating the need for side rails. The bed was developed with the focus wholly on patients requiring special care and at risk of falling from a bed and sustaining injuries. The ability to lower the mattress platform to the floor lessens the chance of injury when falling: in addition, the mattress platform can be raised making transfers in and out of the bed and nursing care, easy and safe. Also available in King Single

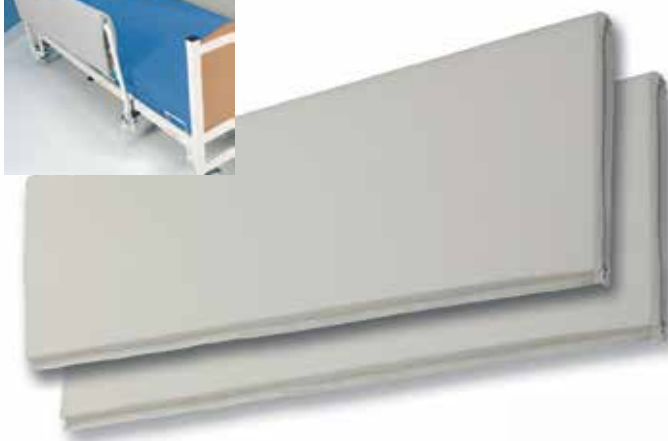

## Single Floorline Bed

Safe working load: 200kg  
Overall length: 2275mm  
Overall width: 1070mm  
Mattress platform height: 75-660mm  
Mattress platform length: 2000mm  
Mattress platform width: 912mm  
Rec. mattress size: 1900 x 880mm  
Backrest angle max: 70°  
Kneebreak angle max: 35°  
Trendelenburg angle max: 12°

## King Single Floorline Bed

Safe working load of 200KG  
External dimensions: 2255 x 1230mm  
Rec. mattress size: 1980 x 1050mm  
Backrest angle max: 70°  
Kneebreak angle max: 35°  
Trendelenburg angle max: 12°

## Padded Bed Rail Protectors

Super soft Bed Rail Protectors are designed to protect patients from injury through limbs striking or getting caught in metal bed rails. Made from soft, medical grade foam cushions covered with a soft two way stretch PU cover including an easy secure Velcro closure for secure attachment. Can be used on both static and collapsible bed rails, the Bed Rail Protectors allow easy access to the bed rail mechanism and can be easily wiped clean.

Available in two sizes – standard (folded height 335mm Length 1260mm Thickness 25mm) and large (folded height 490mm Length 1580mm Thickness 25mm).

## Bedside Safety Crash Mat

Three sections of safety foam covered by a hinged nylon cover are designed to be placed on the ground beside the bed to assist in preventing injuries to patients rolling out of bed. Especially useful with hi-lo beds where nursing protocols prohibit the use of side rails. The Mat can fold up with ties for easy storage when not required.

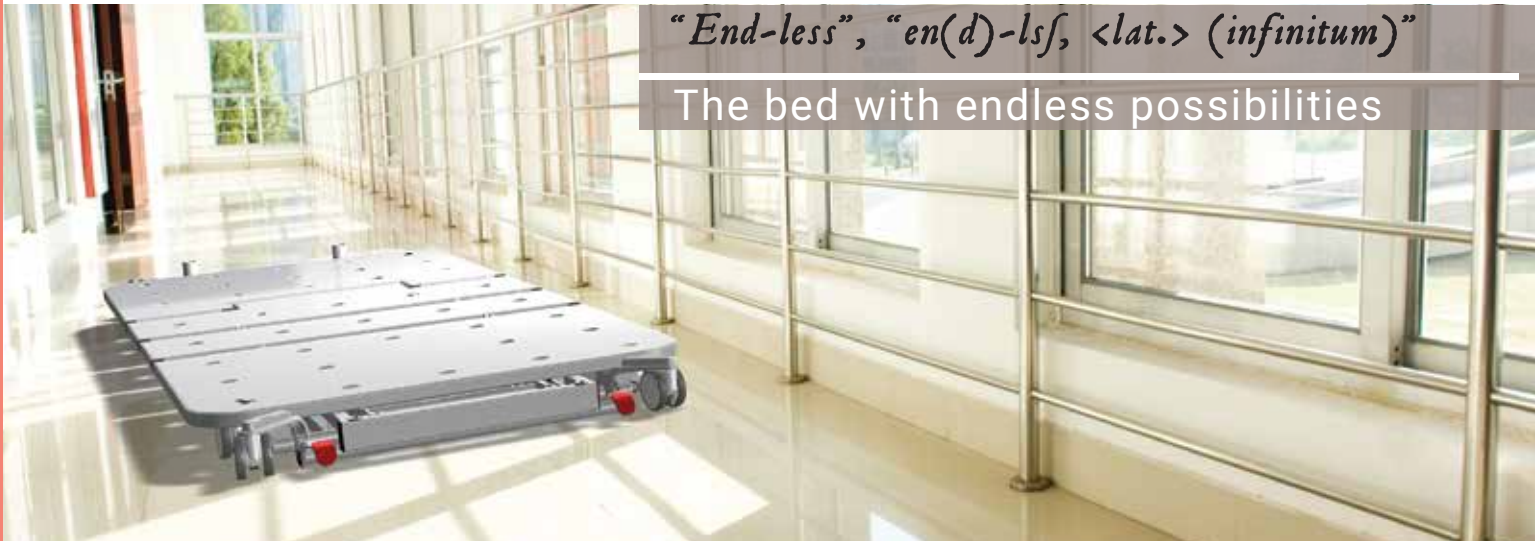

140601

# The Endless Healthcare Bed

*“End-less”, “en(d)-lsf, <lat.> (infinitem)”*

The bed with endless possibilities

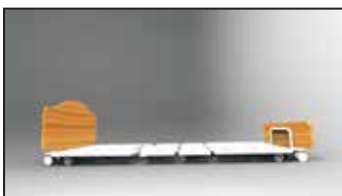

## The only bed of it's type in the world

The universal design of the Endless Floorline Bed is suited for low care, high care and bariatric care. Ideal for patients from domestic through to acute, complex, multifaceted and bariatric settings.

From care of frail, elderly, dementia patients, through to complex, acute, home-care and bariatric settings, this bed has you covered. One bed - endless possibilities

### FEATURES INCLUDE:

- High, medium and low positioning, Backrest and kneebreak function
- Trendelenburg and Reverse trendelenburg
- Chair positioning.
- Dual Locking Castors.
- Auto-regression backrest which reduces shear when profiling.
- Lift off head and footboards.
- 400mm shorter than other floor beds, making it easier to utilise in small and lifts
- Requires no complex installation or maintenance: swift to deploy, easy to maintain
- Is incredibly stable and strong
- Has a genuine\* 10 year frame warranty and 5 year Linak electrical warranty

**Maximum user weight 250kg**

**Single size 1980x880x150**

**King Single size 1980x1050x150**

# Pressure Care Air Alternating Mattresses

When choosing a mattress, it is important to consider its effect on skin protection. Pressure care mattresses may be either static or dynamic. In general, a static mattress refers to a mattress that doesn't move when a person lays on it.

A dynamic mattress is powered by a control unit to regularly change the surface beneath a body. A pressure relief mattress is essential equipment for anyone at high risk of developing pressure ulcers or who have existing pressure ulcers.

All our mattresses use alternating pressure. This means that air is pumped into cylinders that are placed parallel to each other inside the mattress. As one set of cylinders inflates, the other set deflates. This way the pressure under any part of the body is relieved on a regular basis. Achieving an exceptionally high standard in pressure management, they operate by a sequence of air cells gently inflating and deflating in accordance with established alternating principles.

## Carilex 5 Overlay

This is an alternating air overlay system that offers a combination of alternating and static features for low to medium risk patients. The Carilex 5 air alternation overlay offers advanced features such as low pressure alert and internal pressure monitoring.

### Features include:

- Intelligent Pressure Sensing Technology
- Low pressure alarm
- Auto-set – no need to input weight, with ability to manually adjust for patient comfort
- Max. User Weight - 250kg

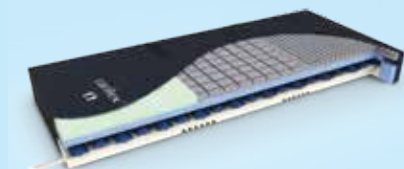

## Carilex 8 Replacement - Low to High Risk

A superior air alternating pressure mattress replacement system. Offering maximum comfort with Intelligent Pressure Sensing Technology (IPS) responding to patient movements by automatically adjusting internal mattress pressure.

## Carilex DualFlex Hybrid Mattress – Low to High Risk

The DualFlex Hybrid mattress is a dynamic replacement mattress system when patient comfort is of utmost priority. The Hybrid combines both high performance static foam, and active alternating air cell technology for exceptional patient comfort and healing. This mattress caters for both higher or lower risk patients all in one, offering a cost effective pressure relieving mattress solution that caters for patients as their needs change.

Specifically developed for patients at 'High Risk' of developing pressure ulcers, this high-performance foam layer features a zonal area design, including; GELTEX® inside technology, to provide effective redistribution of pressure on the sacrum, head, shoulder blades and heel areas. Alternating therapy can be quickly and easily applied by connecting the ultra-quiet pump, whilst still providing a peaceful sleeping environment.

### Features include:

- Intelligent Pressure Sensing Technology
- Low pressure alarm
- Auto-set – no need to input weight, with ability to manually adjust for patient comfort
- Max. User Weight - 250kg

# Pressure Care

600203

## Foot Pillow

Spenco® foot pillows provide relief of pressure for the feet, heels and ankles whether in bed or wheelchair. One size fits all with a Velcro closure. (Sold by the pair.)

600307

## Lambswool Heel and Elbow Protectors (Pair)

Sheepskin will relieve pressure, friction and moisture. Wool will provide cushioning as well as air circulation. Ideal for the prevention of pressure sores.

600316

600302A

600301A

## Medical Sheepskin Products

- Provide a natural solution for problem sleepers.
- Encourage good circulation, helping muscle relaxation and avoiding chills.
- Soothe pain experienced by sufferers of rheumatism, sciatica and backache.
- Give added comfort to those confined to one position for long periods of time.

*Medical Sheepskins and sheepskin underlays encourage good health and can help improve quality of life.*

The Sheer Comfort Foot Care range has been designed to provide comfort, support, security and freedom to those at risk from damage to the skin of the feet or ankles. All products are available in a range of styles, shapes and sizes.

### Wrap-Around Boot

Easy to put on, adjust and take off, the wrap-around boot provides adaptive support and accommodating fit with a low-profile sole allowing outdoor wear.

### Pressure Care Boot

The Pressure Care Boot™ is designed to provide comfort, support and freedom to those at risk from skin ulcers of the foot or ankle, The open toe design allows toe separation and circulation inspection without the need to remove the shoe.

### Short Slipper Boot

The Short Slipper Boot™ is ideal for use both indoors and in bed, and is designed to provide total foot protection.

### Tall Slipper Boot

The Tall Slipper and Pressure Care Boots are designed to provide protection to the entire lower limb in as unencumbered a design as possible. (For use indoors, in bed, or in an inclined chair.)

### Sovereign Snugs

The Sovereign Snug is a low-profile moccasin-style slipper designed to provide exceptional comfort in a pleasing design.

### Heel Protectors

Providing support and security to the delicate heel and ankle area, these flexible protectors can prove invaluable for prevention and rehabilitation of skin ulcers, tears and irritations.

### Elbow Protector

The Sheer Comfort Elbow Protector redistributes pressure and thus eases blood flow over the bony joint. It encourages skin maintenance and repair over this problem area.

# Skin Protection

DermaSavers protect fragile skin from sustaining damage caused by friction, rubbing, abrasion and pressure that could lead to skin breakdown, tears and splits.

DermaSavers can also help to heal existing skin tears, splits and lacerations without the restriction of bandages and dressings.

DermaSaver Skin Protectors are garment-like and can be worn at all times, when required. They can be worn in bed, in wheelchairs and whilst walking, and are available in a full range of pressure-relief and skin-protecting products.

They are fully compatible with topical creams and ointments, and because they are breathable and allow air circulation and constant ventilation, they will protect the skin without the drawbacks of bandages or dressings. The moisture wicking properties of the fabric ensure that the skin remains dry and cool at all times.

## Skin Protectas

The Skin Protecta is an easy-to-wear, moisture transporting anti-friction tube. Preventing skin tears and maintains skin integrity on the limbs of the elderly and those suffering from compromising skin conditions. Consisting of a cushion loop construction made from a highly specialised fibre called Coolmax® which is soft and light, Skin Protecta is fully washable and easy to pull on. Available for the arm or leg.

HipSaver products restore confidence of motion to the elderly, both preserving physical health and increasing senior mobility. HipSaver products are incredibly soft and very comfortable to wear, whilst offering the most effective superior protection.

HipSaver is available in a variety of designs to suit all types of wearer needs, ranging from the elderly in nursing homes, to those who daily participate in exercise programs and even robust activities like jogging.

Hip Measurement	Size

- 4/ Universal Bed Pole
- 5/ Clamp-on Bed Pole
- 6/ Recurved Bed Pole-square base
- 7/ Clamp-on Bedstick with hook tip

The bed pole is designed to fit under the mattress and provide a firm handle to assist positioning, and getting in and out of the bed.

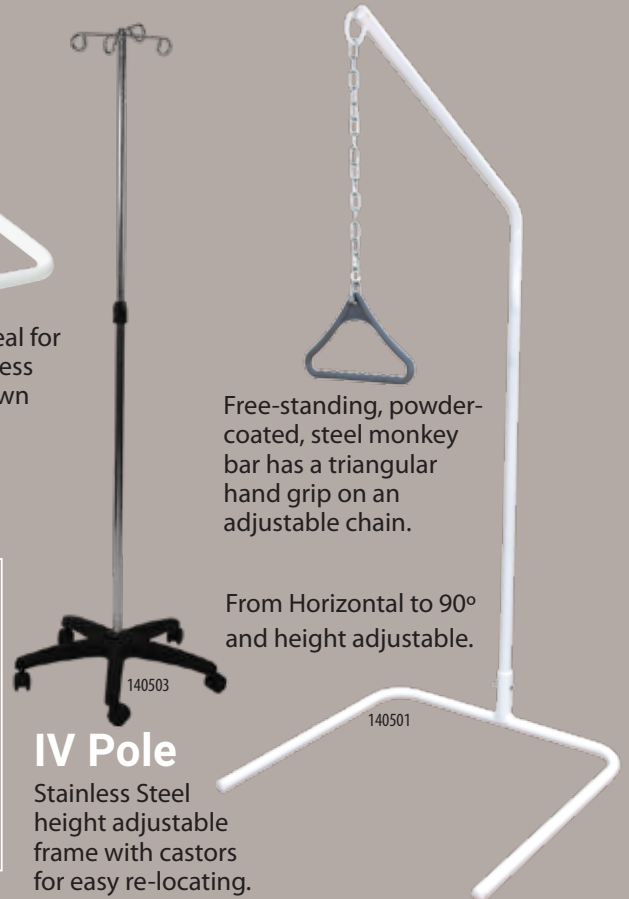

## Dropside Bed Rail

The removable Dropside bed rail is ideal for a domestic bed. It fits under the mattress and is easily locked up or dropped down when required.

Rail length is 900mm

## Overhead Monkey Bar

Free-standing, powder-coated, steel monkey bar has a triangular hand grip on an adjustable chain.

From Horizontal to 90° and height adjustable.

## IV Pole

Stainless Steel height adjustable frame with castors for easy re-locating.

## Bed Raiser

- 1/ Bedraisers 2 Inch ST-BR2
- 2/ Bedraisers 4 Inch ST-BR4

Designed to lift the bed or chair. Available in 2" or 4" varieties.

Over bed tables are lightweight, robust and easy to clean. Their height and tilt adjustments makes them helpful to eat meals from a comfortable seat or bed. The tilting function is helpful for reading the newspapers or books.

## Premium Lift Over Bed Table Split Tilt Top Beech Vinyl Laminate

*A range of easy to operate mobile lifters that allow patients to be lifted and transported from the floor, bed or chair with ease and safety.*

## **Dynamic Heavy Duty Lifting Hoist.**

The Dynamic Heavy Duty Lifting Hoist is a heavy duty, fully featured mobile lifter ideal for the majority of common lifting situations across many care settings. Fold down armrests assist with gait training during rehabilitation or for general toileting. Features the advanced Linak® Jumbo Care Diagnostic Control System for intelligent self diagnostic system capabilities. With low lifting height and soft start / stop function, this product has been designed to provide patient and carer with optimum comfort, safety and security. *Maximum user capacity of 320 kg.*

## **Dynamic Standard Lifting Hoist**

The Dynamic Standard Lifting Hoist is lightweight, with low lifting height and soft start / stop function, this product has been designed to provide patient and carer with optimum comfort, safety and security. This ergonomic lifter is constructed with a powder coated aluminium frame for lightweight manoeuvrability and easy wipe-down cleaning.

*Maximum user capacity of 180 kg*

## **Features of the Dynamic lifters**

- Electrically operated 'U' shaped base with wide flanged front legs for enhanced stability and access.
- Hand-held controller with simple push button operation, includes overload, battery charge and service status indicators.
- Rechargeable battery featuring intelligent diagnostic system for battery level, service status and maximum overload.
- Emergency stop and manual emergency lowering device for optimum safety and control.

## Invacare Birdie Compact 150

Designed to fold easily and without the need for tools, the Birdie Compact can be stored or transported comfortably when space is limited. The compact base and large castors manoeuvre smoothly around beds, in bathroom areas and through narrow doorways. The Birdie Compact is ideal for everyday lifting in the home or an aged care facility environment. Compact without compromising on comfort.

Safe Working Load	150kg
Total width closed (external measure)	55cm
Total length	100cm
Total internal width (base closed/open)	46cm/89cm
Lifting range (from sling attach point)	53cm-160cm
Turning radius	170cm
Base height (top of legs)	11.5cm
Total weight (inc. Spreader Bar)	36kg
Weight of heaviest part (base)	16.5kg
Manual emergency lowering	No
Electric emergency lowering	Yes (up and down)
Castors	Dual 100mm
Charging	Internal and External Std

## Invacare RoZe Standup Lifter

The Invacare RoZe Standup Lifter provides assistance to users capable of bearing some degree of their own weight. It can be used to assist transfers from seat to seat or from seat to standing and is easy to operate in confined spaces. The technology built into the RoZe with 'Soft Start' and 'Soft Stop' functions and wide leg openings ensures a smooth and safe transfer. The RoZe is mounted on four wheels and can easily be moved to wherever it is needed.

Overall height	94 cm to - 161 cm
Clearance	12 cm
Castors	10cm
Safe Working Load	200kg
Length of Base	112cm
Base width operation	66cm
Height of Base	12cm
Min height of central suspension point	94cm
Max height of central suspension point	161cm
Machine weight	53kg

a

## a/ General Purpose Sling

Available in four sizes in a choice of fabric or mesh. The General Purpose sling provides easy fitting and good support for patients with some upper body control.

## b/ General Purpose Sling with Head Support

Available in five sizes in a choice of fabric or mesh. The sling provides easy removal of clothing or toilet transfers. Recommended for general toilet transfers for the less secure patient.

## c/ Paediatric Sling

Available in three sizes in mesh only. The sling provides easy fitting and good support for children or small adults. Designed for general lifting with children or small adults.

## d/ Standup Slings

Standup Slings are designed to lift the patient comfortably from a seated position into a relaxed upright position. The high-cut, padded Stand Up Sling supports the patient from waist to shoulder while allowing the arms to move freely so that the hands can reach naturally to grip the support rails as the patient rises.

b

c

d

## Etac SlingOn

Primarily designed for easy insertion of a hoist sling in bed without the need for rolling or moving the patient. The Etac SlingOn is an optimal tool for users that need frequent hoisting.

### Intended Use

- Application of a hoist sling without rolling
- Minimise friction under pressure points
- Turning
- Positioning
- Move higher up in bed

**Etac Sling On**  
LARGE 99-437  
SMALL 99-IM437/5

## Etac 4Way Glide LPL

A complete in bed system for turning and positioning of users with reduced mobility, high weight, pain or pressure issues.

### Intended Use

- In bed system, user with reduced mobility
- In bed system, heavy user or user with pain or pressure ulcer
- Turning
- Positioning
- Support horizontal transfer
- Can be used with support of a hoist

**Etac 4way Glide**  
99IM110200

## Transfer Boards

A transfer board is intended to bridge shorter gaps when performing seated transfers. The board's low friction upper surface allows the user to transfer independently or with assistance.

Transfer boards are used when transferring between bed and wheelchair / shower chair, between wheelchair / chair / toilet chair or to and from the car.

**Etac 3B-Board** 99IM403

A traditional curved transfer board for use in multiple transfer situations.

**Etac E-Board** 99IM408

A light, thin and flexible transfer board designed for easy use; available with or without wings.

**Etac E-Board with wings**

MED 99IM404 60x33cm  
LARGE 99IM405 75x33cm

**Etac Butterfly** 99IM401

Long, wide and stable transfer board with special cut outs for wheelchair positioning. Can be used with the Butterfly GlideWing providing additional low-friction surface for increased slide function.

**Dolphin** 99-IM409

A sturdy and stable transfer board uniquely designed for toilet transfers.

**All Etac Transfer Boards have a non-slip surface on the underside. Combining a transfer board with a glide cushion provides even lower friction and is recommended when the transfer involves bare skin, for instance to and from a shower chair or toilet.**

## Etac MultiGlide Gloves

Versatile for a range of patient handling situations, Etac's MultiGlide Gloves are ideal for small re-positioning adjustments, movements or smoothing out bed sheets. Also useful when checking for adequate support when using pressure relieving cushions or mattresses, the glove facilitates placement of the hands between the user and mattress or cushion.

## Etac Positioning Wedges

Etac Positioning Wedges are a multi-purpose product for use as a standalone positioning device or as an additional stability tool with other products. Ideal as a temporary side bolster to help prevent falls.

### Key Features

- Small and large sizes available
- Comfortably support patient in static position
- Minimises strain on care
- Non-slip cover for easy wipe cleaning

## Slide Assist

The Slide Assist Range encourages "zero lift" or "minimal lift" policies, in domestic and institutional environments. It aims to enable carers to move people with minimal effort, without the risk of injury and discomfort to those being assisted, therefore enabling safe patient handling with comfort and dignity.

Slide Assist products are useful for the correct positioning of people on pressure care cushions, seating the elderly at dining tables, repositioning disabled patients on their wheelchairs after bathing or toileting, or sliding patients in the correct position on their beds.

## Etac Turner

A practical aid which supports and activates the patient when transferring from one seated position to another. It offers security for the person being transferred and will not strain the caregivers' back.

### Easy and safe transfers

- The Turner reduces the risk of falling, and it also allows the caregiver to work in an ergonomically correct position.
- Unique patient turner and transfer aid that facilitates seat to seat transfers, for patients who are able to bear their own weight when standing.
- Allows carers to work ergonomically, without strain to back or arms while still maintaining eye contact.
- Promotes continued mobility as patient actively moves to a standing position.
- Movement up and down controlled by the patient for enhanced security.
- Low footplate (13 mm high) makes foot placement easy while non-slip surface offers additional security.

## Swift Patient Mover

A compact standing aid that facilitates standing and transfers in the home, community and facility environments. Offering a more active transfer solution, users are encouraged to stand up independently, improving circulation, breathing and muscle strength. The Swift Patient Mover is an ideal alternative to a patient lifter for users with appropriate sitting balance, who require transfers over greater distances.

Four user contact points (foot platform, knee pad, seat pads and grip handle) promote stability, support and comfort for the user, resulting in greater confidence in the transfer.

Height adjustable soft knee.

Soft seat pads - swing out of the way to allow user access and swing back into place to provide a comfortable seating surface.

Lockable 75mm castors - the platform remains stationary while a user is transferring, while minimising the leg height for sufficient clearance beneath beds and furniture. Width adjustable legs activated via 2 foot pedals, provide the ability to manoeuvre closer to furniture, toilets or beds for safer access.

<b>Overall Length</b>	<b>820mm</b>	<b>Overall Width</b>	<b>490-760mm</b>
<b>Seat Pad Height</b>	<b>620-670mm</b>	<b>Overall Height</b>	<b>1060mm</b>
<b>Knee Pad Height</b>	<b>250-490mm</b>	<b>Max User Weight</b>	<b>185 kg</b>

21-0400

*Patients stay happy, safe, comfortable and independent in their own homes.*

*Falls in the elderly lead to an increase in the risk of hospitalisation and a significant health decline. As well as physical injuries suffered, the psychological and social consequences of falling can have an equally huge impact. People who fall may suffer depression, anxiety, isolation and loss of independence.*

*Falls are the second leading cause of hospital admissions due to injuries, and many older people never fully recover from their fall.*

Maintaining your duty of care is a lot easier with the Dynamic Falls Prevention suite of products. This state of the art system, offering floor, chair and bed mats, coupled with an alarm monitor is specifically designed for Nursing Home, Hospital or Home Care Environments.

The mats are connected to the alarm monitor by cord, or wirelessly, so that when the floor mats are stepped on, or if the patients weight is fully removed from the chair or bed mats, that the monitor alarms and alerts the carer that patient is moving.

The alarm will be heard in other rooms, allowing you to respond to the alert, and get to your patient to assist them. In many circumstances, the patient will sit back down and wait for the care person when they hear the alert. Once the alarm is silenced the automatic system resets itself, and is ready to alarm again.

### **Features**

- Simple operation and maintenance.
- Adjustable Alarm volume and tone.
- Alerts for low battery.
- Can be connected to Nurse Call system.
- Auto rearm after alarm activation.
- Visual Alarm indicator.
- Reset button. (To Silence the Alarm)
- 1 year manufacturer's warranty on alarm and floor mat.
- Operates on 3 AAA or AA batteries (not inc)

## Deluxe Range

**4107 Monitor**

**4103 Single Fold Floor Mat**

- Stationary light or portable torch.
  - Motion and low light sensors.
  - Battery operated or run off mains.
  - Power adaptor also included
- DVA approved.**

### Touch Lamp 140700

- Easy touch for on/off..
  - Shatter proof lamp shade.
  - 11 watt bulb for great lifespan.
  - Operates on mains power.
- DVA approved**

# Personal Alarms

## Mindme Pro SOS & GPS Pendants

The MindMe Pro SOS & GPS alert pendant keeps the wearer in touch with family and carers whether they are at home or out and about.

### Suitable for

- The Elderly
- People with disabilities
- People in early stages of Alzheimer's and dementia
- Those concerned with personal safety

### Package includes:-

- Mind Me Unit
- Docking Station
- User Guide
- Charger
- Lanyard
- SIM Card

### Features of Mindme Alarm

- Size 60mm x 44mm (wide) x 14mm and weighs 40 grams.
- Uses a multi-network SIM chip (instead of a SIM card) as long as a mobile network exists the device will remain connected.
- Uses GPS to work out its location - accurate to 10 metres.
- Sends location to Mindme secure servers around every 3 minutes. 10 minutes when stationary.
- Pressing the button and using GPRS the alarm connects quickly to Mindme's 24/7 Response Centre
- Two-way voice communication ensures the right help is available quickly.
- Battery lasts up to 48 hours.
- Simple to use charging unit with no fiddly connections.
- System sends e-mail when battery is under 10% capacity.
- Ring fence option available – alarm will be tripped if user moves outside pre-set locations.

#### Fall Detection

When a fall is detected and the wearer does not move for 10 seconds, Mind Me will automatically send an SMS alert to the emergency contacts.

#### One Button Operation

When the SOS button is pressed Mind Me will send an SMS to the emergency contacts with a Google Maps link and then ring the contact numbers until the call is answered.

#### 2-Way Hands Free Communication

When an emergency call is answered, the wearer and the contact can have a 2-way conversation. The contacts can also ring the Mind Me alt any time to talk to the user.

#### Built-in GPS

When the SOS button is pressed, an SMS and a link to Google Maps is sent to the contacts. When the link is pressed the location of the wearer is shown on Google Maps.

#### Use in home or when out & about

Mind Me works wherever a mobile phone or GPS works. Whether the wearer is at home or out and about, they will always be in contact with the family or carers.

#### Geo-Fence

If the wearer tends to wander, a geo-fence (boundary) can be set up so when the fence is breached a SMS alert is sent to the contacts-

## Mind Me Watch

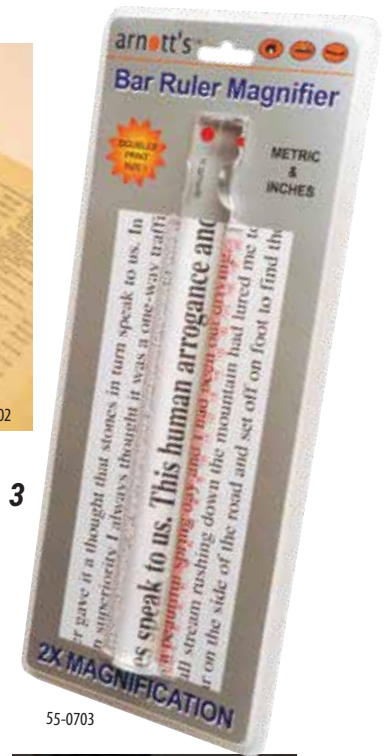

The MindMe Watch combines a watch, mobile phone and GPS device to assist individuals seek assistance in an emergency, giving the wearer confidence and independence by keeping them in touch with family and carers whether at home or out and about.

- Grip dots withstand high temperature laundering.
- Available in all sizes (2-8, 6-11 & 11-14)

## Etac Beauty & Body Care products

Our ergonomically designed Bath & Beauty products make everyday activities like showering and combing hair easier by combining maximum power and reach with minimal strain on your hands, arms and shoulders.

99-80210068

99-80210072

**Beauty Hairbrush and Beauty Comb.** Available in two lengths, the shorter version is recommended when the user can reach up to the ear. The longer version is suitable for users who only can reach to the shoulder. Both the brush and comb are curved for the best comfort and control when combing/brushing the hair.

99-80210080

99-80210076

**Beauty Body and Back Washer.** Designed to make it easy to reach and wash the body. The wash cloths do not absorb water which make the products light and balanced even when wet. The handles are oval and have a surface which enables a secure grip. The wash cloths are machine washable and replaceable

**Beauty Hair Washer.** Substitutes the fingers to apply shampoo and massage the scalp. The shaft and handle are of the same design as the body washer, making it easier to reach the head without strain on the hands, shoulders or arms.

**etac**<sup>®</sup>  
Creating Possibilities

# Independent Eating

## ELISPOON

A revolutionary spoon that enables independent eating for people with hand coordination difficulties such as Cerebral Palsy, Spinal Cord Injury, or Post-stroke deficits. It keeps the spoon bowl level regardless of how your hand or arm twists or moves, preventing food spillage. No electrical components or batteries, making it easy to use and easy to clean. Dishwasher Safe.

We have an extensive range of eating and drinking aids. Providing practical solutions for eating and drinking including a variety of cutlery, cups and accessories. Depicted are just some products in our range.

## ONE TOUCH™

One touch products open all standard sized bottles, Cans and Jars with just the one touch. Runs on AA sized alkaline or rechargeable batteries.

# SaeboGlove

This cutting edge device helps clients suffering from neurological and orthopaedic injuries incorporate their hand functionality in therapy and at home. The lightweight, low-profile functional design is just one of the many innovative features that are offered with the Saebo Glove.

The proprietary tension system extends the fingers and thumb following grasping so clients can incorporate their affected limb functionally. This new found freedom leads to improved motor recovery and functional independence.

## Features:

- Spiral forearm design that secures the wrist in a functional position.
- Tensioners are located at the IP points (*interphalangeal Joint*) of the fingers and thumb to assist with the extending the digits following grasping.
- Individual tensioners can be removed to customise assistance based on the client's needs.
- Numerous sized Tensioners included to accommodate various finger lengths.
- Full joint finger motion enables maximum functional performance.
- Silicone covered fingertips to improve traction during grasping.
- Non-slip liner to minimise migration.
- Glove includes Lycra material for expandability.
- Palm exposed to increase breathability and ease of donning.
- Lightweight and comfortable.

◀ The **SaeboStretch** is a revolutionary hand splint for individuals suffering from neurological injuries such as stroke. The splint helps to prevent joint damage while improving and maintaining range of motion.

The SaeboStretch allows the fingers to move through flexion caused by postural changes, associated reactions and increased tone. It then gradually repositions the fingers into extension. It includes three different hand pieces that offer various grades of resistance.

◀ The **SaeboStep** is a lightweight, uniquely designed foot drop brace that provides comfort while offering optimum foot clearance and support. Designed to replace uncomfortable, stiff, or bulky splints that go inside the shoe that lack support and durability.

550501 550502

A comprehensive range of dumbbells and accessories are available. Ideal for low-impact exercise right through to a regimented fitness program. Weights start from 0.5kg

**Squize Ball** 95-0901

Squize balls build strength in fingers, hands, arms and shoulders. They help to achieve stronger grip and improve wrist strength. Ergonomically designed to the shape of a squash ball, they fit perfectly in the palm of smaller hands or between fingers. Choose from 3 strengths; soft, medium or hard.

**Exercise Putty**

Putty can be used in therapy to improve grip strength, dexterity, and hand strengthening through finger, hand and wrist resistive exercises. Each colour-coded putty comes in different consistencies

**Fitness Ball**

Fitness ball has been scientifically proven to improve both your posture, core strength and your overall balance and stability. Fitness Balls are also often used in rehabilitation and in the treatment of back pain.

Available in: 55cm, 65cm & 75cm

**Yoga Mat**

Used during Yoga or any other exercise, Yoga Mats are used to improve balance and can also aid in the prevention of injuries that can be caused by otherwise slippery surfaces.

Available in:  
1720 x 610 x 4mm  
1820 x 610 x 6mm

950701 950702

950210

**Vinyl Dumbbells**

Vinyl Dumbbells are perfect for a variety of individual and group workouts, including jogging and power walking, aerobics, general exercise, physical therapy and even yoga routines. These easy to grip, easy to clean Vinyl Dumbbells are colour coordinated and available in 0.5 incremental weights ranging from 0.5kgs to 10kgs.

**Exercise Mat**

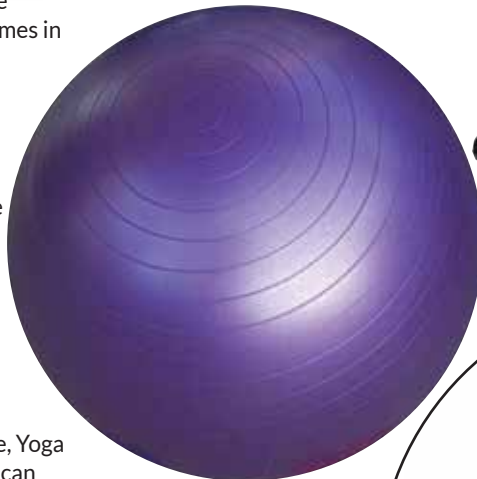

Manufactured from a closed cell material that is resistant to moisture. The exercise mat is a great accessory for any user who gets a sore back when performing floor exercises. Ideal for use in aerobic, yoga and pilates classes.

Available in: 1800 x 1200 x 20mm  
1800 x 600 x 10mm

950703

950704

950101

**Exercise Bike**

**Exercise Pedals**

951001

96-T4085

**Thera-Band® Door Anchor**  
Simply insert this anchor into the pull side of a door, completely close and latch the door, and your TheraBand is ready for action.

**Therahandles (2)**

Comfortable, good quality handles to assist exercising with resistive bands and tubing. Foam covered handle for a better feel.

96T7785

**Thera-Band® Exercise Bands**

Thera-Band® latex Exercise Bands are used for resistive exercise. They provide both positive and negative force on the muscles, improving strength, range of motion and cooperation of muscle groups. Colour-coded progressive resistance gives at-a-glance documentation of progress from one level to the next.

95-0501

**Resistance Stretch Band**

By using a resistance band or tube, you can deepen your stretch and increase your flexibility. The resistance band allows you to change your positioning in multiple ways. This changes how your body works and how an exercise feels.

950228

**Footsure® Vinyl and Leather Ankle Weights**

Footsure ankle weights are less bulky, making them extremely comfortable during use. Velcro fastening allows you to wrap one weight over another or use as wrist weights.

950218

**Adjustable Ankle Cuffs**

By being able to increase the weight of the cuff from 0.5kg all the way up to 10kg, this allows greater flexibility in what you can achieve. (0.5 kg weights sold separately in packs of 10)

**massage**

**Index Knobber**

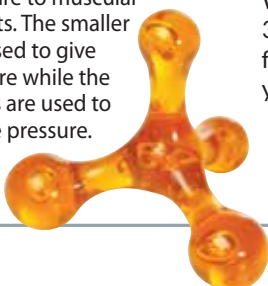

Developed as a device to be used by practicing, hands-on therapists. Therapists who use The Original Index Knobber II to treat patients find it extremely helpful in applying precise pressure to soft tissue trigger points.

950803

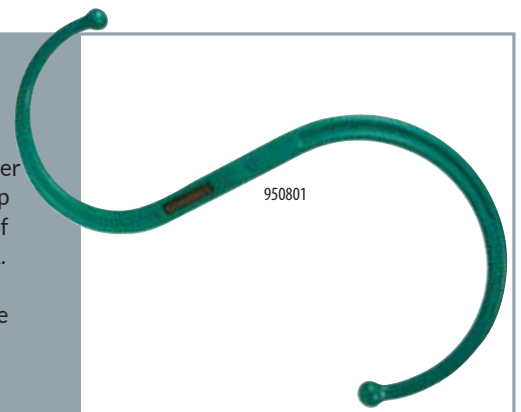

**Jacknobber**

The knobs at each of its four points can be used to apply pressure to muscular trigger points. The smaller knobs are used to give deep pressure while the larger knobs are used to apply gentle pressure.

**Backnobber**

The Original Backnobber® II is used by hooking the device over a shoulder or under an arm and using its leverage to apply deep pressure to trigger points in the muscles of the neck, shoulders, upper and lower back. This pressure can significantly reduce tension and pain in soft tissue and increase the range of motion and overall function.

950801

**Wobble Board**

Improve your balance and co-ordination and increase your range of motion with the Wooden Wobble Board. The base allows 360° of movement. The board features non-slip traction to help you keep your grip.

950301

Decreasing pain and enhancing human performance through extraordinary innovation, education and service.

Premium Bracing is the result of combining innovative designs and a firm understanding of biomechanics, with materials that have been designed specifically for sports medicine applications.

Bioskin® is your choice for premium compression bracing.

### Bio Skin® Thumb Spica

This ultra low-profile brace protects the thumb from unwanted motion while allowing full range of motion in the other digits.

### Bio Skin® Cock up Wrist Skin

The DP2™/DP3™ Cock-up wrist brace was designed to be the most comfortable and functional wrist-brace ever. The dorsal and palmar stays are removable and can be reshaped by hand to customise the shape of the brace.

The low-profile brace allows full use of your fingers while limiting motion in the wrist to ease the pain from carpal tunnel syndrome, arthritis, sprains, and bursitis.

### Bio Skin® Boomerang™

The Boomerang comfortably provides compression and support for minor wrist problems. The wrap is easy to apply and fits onto either hand.

### Bio Skin® Wrist/Thumb Spica

The brace protects the thumb and wrist against painful movement by controlling the motion of the CMC and Mp joints, while allowing full use of the fingers.

### Bio Skin® Hinged Knee Skin™

The Skin® Hinged Knee Skin™ Is the lightest hinged knee brace available. The offset, bicentric hinges conform to the shape of the leg and provide extra support to knees with ligament damage. Constructed from Bio Skin's® unique, breathable materials, the Hinged Knee Skin™ also provides excellent compression to control swelling and pain and to speed healing in a damaged joint. Wrap-around design allows for easy application.

- Front Closure application
- Offset hinge reduces pressure at the knee joint
- Unique strapping system minimises migration
- Donut and horseshoe buttresses can change position to allow custom patella support

### Bio Skin® Standard Knee Skin™

Bio Skin's™ Standard Knee Skin™ gives optimal compression for pain reduction, swelling control, and increased proprioception.

### Bio Skin's® Visco Knee Skin™

Bio Skin's® Visco Knee Skin™ is an excellent all-purpose knee brace. The Visco gel ring around the patella provides passive massage to remove swelling and decrease pain.

### Bio Skin® Q Brace™

The Q Brace™ has a unique design which allows multi-directional traction of the patella. The "T" strap prevents dislocation and may be attached in various positions to control the direction of traction on the patella. The design of the brace causes the force of traction to increase as the knee goes through a range of motion.

Bioskin® is a unique, patented material designed to provide high level compression without creating discomfort. Bioskin® is thin and gives radial compression so it conforms nicely to the curves of the body. Bioskin® is also breathable, so perspiration evaporates right through it, it is hypo-allergenic so you don't have to worry about skin reactions. These characteristics make wearing Bioskin products a surprisingly satisfying experience.

- Breathable
- Light
- Hypo-allergenic
- Latex Free
- Durable
- Thin
- Odourless
- Machine washable
- Strong
- Neoprene Free

### Bio Skin® Tennis Elbow Band

The Tennis Elbow Band fits comfortably below the crease of the elbow and includes a silicon pad and an elastic strap that may be positioned to provide extra compression and pain relief.

### Bio Skin® Standard Elbow Skin

The Standard Elbow Skin™ keeps you cool and dry while providing outstanding compression for pain management.

30B42100

### Bio Skin® The Q Baby™

The Q Baby™ wraps comfortably around the knee, just below the patella, and includes a uniquely shaped silicon pad that fits over the patella tendon to give pain relieving compression for patella tendonitis and to increase surface contact area in the joint.

30B51650

### Bio Skin® Standard Ankle Skin™

Bio Skin's® Standard Ankle Skin™ is an economical way to control swelling and support ankles with minor instability.

30B53500

### Bio Skin® Calf Skins™

Bio Skin's® Calf Skins™ give excellent compression to ease the pain in injured calves or shins. The unique SkinLok™ feature of the Bio Skin® material mean the sleeve won't slide down the leg, even during vigorous activity.

30B46300

### Bio Skin® Trilok

Whether you're looking for a brace to protect an ankle you've already injured or you're hoping to prevent an ankle injury, Bio Skin's® TriLok™ is the most effective brace for controlling inversion, eversion, and plantar flexion inversion. No other brace offers more stability, comfort, and safety.

30B53601

### Bio Skin® Flexible support

Provides multi-directional support. Choose one of two placement options:

### Bio Skin® Backskin Lumbar Pad

Offers a broad variety of pad positions to fit directly over the pain.

### Bio Skin® Backskin™ system

Treat lumbar sprains, pain from overuse, muscle strains, and develop better back posture. We've designed our back brace with a narrow cut in the front and flexible stays on the sides so when sitting or bending the brace remains pliable and doesn't impinge on the groin area or into the rib cage.

Customize your treatment with these lumbar support options:

30B47200

# Back Supports

We stock an extensive range of therapeutic pillows. Drop in, try the back support in your car, or the sleeping pillows on our range of mattresses.

650233

### Back Eze MK2

The Back-Eze Moulded support cushion range are lightweight, portable and retains their shape to last for years.

650203

### Back Eze Standard

### Total Spinal Support

Full-length back support featuring flanks for added lateral support. Ideal for car or lounge.

650215

650227

### Bassett Lumbar Support

Perfect for the bed, floor, or couch. You can use it anywhere you choose.

650204

### Back Form Support

Supportive flanks and tapered back corners to compensate for curved car bucket-type seats.

650201

### Back Hugger

Versatile Lower back support that features inbuilt spinal support column to snugly fit into the back.

650211

### Koala Komfort

Perfect for the bed, floor, or couch. You can use it anywhere you choose.

65-0410

# Heat Wheat

The grain used in the manufacture of Heat Wheat® products is treated with our exclusive Ultrashield™ process to be free from weevils, mould, allergenic dust and moisture induced growth. This unique seven-stage treatment process gives the wheat superior temperature retention properties and makes it durable enough to go from freezer to microwave for years.

The products mould comfortably to the body and provide penetrating warmth (or cold) to injuries or chronic conditions such as arthritis, migraine, muscle tension, spasm and joint pain. The products also induce relaxation and give comfort with warmth.

HEALTH & WELLBEING

# Vulkan Range of Sports Bracing

Vulkan has been a trusted name, innovating the market in braces & supports for 40 years. Now Vulkan continues that tradition with the introduction of Vulkan Professional Orthopaedic range to the Vulkan brand family. Vulkan Professional Orthopaedic range offers a comprehensive selection of quality supports to meet the exacting requirements of health professionals. The Professional Orthopaedic range has the largest selection covering all anatomical areas and offers both universal and broad size ranges, designed for most injuries, conditions or postoperative support. A combination of closed cell neoprene construction and elastic materials helps retain heat at the site of injury for faster recovery.

30-VLK-1188

## Wrist/Thumb Support

Wrist Thumb Support provides superior support and stability to thumb with mouldable thermoplastic insert. 6" (15.2cm).

30-VLK-36

## Elastic Ankle Support

The Vulkan Advanced Elasticated range is the latest innovation in lightweight supports. Provides uniform support & compression, but has unique heat retaining properties that increase blood flow around the joints during activities to speed up the natural healing process. Available in pink & black.

## Stability Ankle Brace

Vulkan Stability Ankle Brace provides high level stability and protection to ankles prone to rolling or twisting. Ideal support during sports and post injury.

30-VLK-4005

30-VLK-1790

## Ice Bag Wrap

Features a removable 20cm (9") ice bag with adjustable wrap for knee; can also be worn on elbow or ankle. Neoprene wrap holds ice bag in place and provides support. Universal size, fits most.

30-VLK-1072

## Shoulder Support

This is a closed cell neoprene support with compressive and proprioceptive effect to retain warmth whilst increasing blood circulation. Latex free.

**VULKAN**

**Back Belt with Tens**

Flexible and adjustable with Velcro fastening for electro stimulation for back pain relief.

# Stockings & Aids

The Butler Off (doffer) helps to maintain independence by simply using the hook on the top of your sock or stocking and push directly down the leg and over the heel.

550127

**Stocking Donner Stand**  
Designed to make donning compression stockings easier and protects against tears and runs that can occur applying hosiery by hand. Recommended for those with limited dexterity.

550105L

550101

550104

The Ezy-As is designed to be used by people who are unable to apply their own stockings. This Garment Applicator is compatible with open and closed toe and knee high and full leg stockings, tubular bandages, anti-embolism stockings, arm sleeves and gauntlets. Available: Small, Medium and Large.

550102

**Ezy-As™ Handle Attachment**  
Accessory to aid solo fitting, Ezy-As™ also supply a handle attachment (sold separately), clips onto the base of the applicator, and once loaded is used to help pull the garment up a leg.)

## Graduated Compression Stockings

Healthy legs are essential for good quality of life. Whether your vascular care is for a pre-existing condition or to help prevent vascular problems, we stock an extensive range of graduated compression stockings. Graduated compression stockings improve circulation by applying measured pressure on the leg muscles. These muscles compress the veins, improving the flow of the blood back to the heart so there is less swelling, tiredness and aching in the legs.

Our Range includes:

**Light Compression (15-20 mmHg):** Minor foot, ankle and leg swelling, leg heaviness and fatigue due to varices, mild varicosities without oedema, helps prevent thrombosis (inc. Travel-related DVT), help prevent varicosities during pregnancy.

**Moderate Compression (20-30 mmHg):** Moderate to severe varicosities including pregnancy, leg heaviness and fatigue due to varices, varicose veins during and after pregnancy, post sclerotherapy, helps prevent thrombosis, helps prevent recurrence of venous ulceration, oedema and superficial thrombophlebitis.

### Venosan Athletic Unisex Socks

Venosan's selection of unisex sock products are ideal for exercise, travel or daily living. Cushioned foot beds and balloon toe pockets, provide day-long benefits of comfort and relief from the effects of venous disease and/or daily living.
